ABOUT DEEPAK NITRITE

Reduction, Sulphonation, Condensation, Diazotisation and Oxidation.

As a multi-division and multi-product, India-based chemical manufacturing Company, with diversified business segments and product portfolios, we enjoy a leading market position in most of our products in the domestic as well as global markets. In addition to well-established multinationals, some of whom we create customised product offerings for, our client list also includes several Fortune 500 Companies.

To maintain our leadership position, we lay strong emphasis on our in-house Research & Development. This has led to the development of a range of new product applications and a deeper understanding of our customers' preferences. Consequently, we are leading global player for several niche chemical products, like Xylidines, Cumidines, Oximes and Colour Intermediates.

Beyond ISO certifications, due to our work policies and processes, we have been accredited with a "Responsible Care" certification.

We have a rich heritage of consistently rewarding our Shareholders with dividends and augmenting Shareholders' wealth through consistent performance.

As a part of our growth plans, we have forayed into a Greenfield project at Dahej, Gujarat, to manufacture Phenol and Acetone, through our subsidiary, Deepak Phenolics Limited.

Established in the 1970s, by Shri C. K. Mehta (Founder & Chairman Emeritus), Deepak Nitrite Limited (DNL) is a leading Indian chemical manufacturing company with a product portfolio that comprises Basic Chemicals, Fine & Speciality Chemicals and Performance Products.

Our distribution network spans over 30 countries worldwide, while our ISO certified manufacturing facilities are located at Nandesari, Dahej (Gujarat), Roha, Taloja (Maharashtra) and Hyderabad (Telangana) and our R & D facility at Nandesari (Gujarat). Our wide bouquet of products enables us to cater to several industries, including Colourants, Petrochemicals, Agrochemicals, Rubber, Pharmaceuticals, Paper, Textile, Detergents, Fine & Speciality Chemicals, etc. We have developed expertise in multiple chemical processes, including Nitration, Alkylation, Nitrogen Oxides Absorption, Hydrogenation/

FROM THE DESK OF CHAIRMAN & MANAGING DIRECTOR

Dear Stakeholders,

Financial Year (FY) 2016-17 has been a highly eventful year for your Company. Despite many headwinds, significant progress was made in execution of strategy and achievement of its mission, thus underlining your Company's business strength and resilience.

The change at the helm in India in May 2014 was supplemented by expectations of bold reforms in economic and industrial policies. After an initial period of consolidation, the reforms agenda has gathered momentum and the economy has been restored on a path of high growth. The Indian chemical industry stands to gain from this growth and the policy changes have positively impacted the sector. In order to boost manufacturing in the country, the Government launched the 'Make in India' campaign and alongside theme of Ease-of-Business announced by the Government received encouraging response with several global leading companies coming forward to commit

investments in setting-up world-class manufacturing units in the country. Several large commitments in the chemical sector will undoubtedly increase the output and contribution of the sector in the years ahead. We are witnessing a shift globally and Asia, being the epicentre of growth and enjoying abundant skilled resources, is emerging as the world's chemical manufacturing hub. Within that, India enjoys low-cost manufacturing capabilities by virtue of relatively lower-cost labour, highly competent leadership and geographic proximity with the Middle East, one of the world's key raw material sources. Recent developments contributing to a stronger and stable currency, positive governance environment and improvement in skills and capabilities is serving to enhance the competitive advantage. With the benefits of several tailwinds and the Government's focus on eliminating the infrastructure gaps in the country through investments in solar power, coal-based power plants, availability of power and decreasing trend of power tariff, large-scale

"We are witnessing a shift globally and Asia, being the epicentre of growth and enjoying abundant skilled resources, emerging as the world's chemical manufacturing hub"

improvement in surface and water transportation system, India is elevating its position as a critical manufacturing hub for the global speciality chemicals industry. On the environment front, Government has been strict in norms, which shall continue helping entities like Deepak Nitrite to operate for long-term growth opportunities.

FY 2016-17 also witnessed some key developments both in India and across the globe which have the potential to reshape the global business dynamics. A sharper degree of resistance to globalisation has resulted in regime changes in the US and a vote for the 'BREXIT' in the UK. The enhanced focus on job creation in the home country is forcing governments to be more focussed towards protecting manufacturing. Simultaneously, in India, the ongoing progress towards the GST regime combined with steps to transform India into a 'less-cash' society will strengthen the fabric of organised industry. Drive of demonetisation created initial hiccups before swiftly moving towards a normal situation which fructifies Government efforts towards a transparent economy. Further, multiple initiatives to boost the rural economy announced in the Union Budget 2017 combined with improved monsoon trends are expected to favourably impact demand for end-user products from those markets in the medium to long-term thereby benefiting the overall chemical industry. In light of

this, it is favourable that your Company is poised to significantly elevate the degree of focus on the domestic market in the coming years.

During the year under review, your Company witnessed a slew of unforeseen events. It encountered headwind in the form of temporary closure of one of its three units at Hyderabad facility due to excessive flooding and hence issues related to pollution. However, all necessary steps were taken to address the compliance conditions and your Company received a permanent revocation order from regulators which served to reinforce the strength and quality of operations. In addition to this unexpected development, a fire broke out at one of the distillation columns of Company's manufacturing facility at Roha Industrial Estate in Maharashtra. It was an unfortunate event, however, the Company's trained rapid response team could avoid larger disaster. The damaged facilities have been reconstructed within a reasonably brief period, which gives me satisfaction. Your Company is adequately covered under insurance for replacement value of the damaged facilities and loss of profits due to business interruptions. While both these unforeseen incidents were swiftly brought under control, our performance in the third quarter was impacted.

FY 2016-17 also saw some setbacks in terms of reduced requirements for fuel

additives due to change in dynamics of the oil supply market as well as volatile crude oil prices which led to re-pricing of products linked to global prices of crude and related petrochemical intermediates. However, by leveraging its plants and as a part of its long-term strategy and sustainability focus, your Company was able to diversify its products, markets and end-user industries in a manner that downturn in a particular end-user segment is mitigated by capitalising on opportunities in other end-user segments, thereby providing a natural hedge.

Your Company reported resilient performance during the year even in the face of one-time developments that occurred in the third quarter. The turnaround of performance effected in the fourth quarter to recover from the impact of developments in the immediately preceding quarter was particularly heartening.

Your Company raised ₹ 150 crores through Qualified Institutional Placement (QIP) in March 2017 at a price of ₹ 104 per Equity Share (including premium of ₹ 102 per Share). The proceeds, which will be deployed towards funding the Greenfield Project for the manufacture of Phenol and Acetone, saw strong response from high quality domestic institutional investors resulting in subscription of over 2.2 times the issue size, exceeding

₹ 340 crores. It may be worth mentioning here that, in January 2016, the Company raised ₹ 83 crores through Qualified Institutional Placement at a price of ₹ 70.90 per Equity Share to part fund ongoing Phenol project. I thank all investors participating in QIP, reposing confidence in the Phenol project of the Company, which is set to escalate the Company into a new high rung.

The Board of Directors recommended a Dividend of ₹ 1.20 per Share of a Face Value of ₹ 2 each. Your Company has been consistent in paying the Dividend for past many years. The Dividend rate has been maintained despite the expanded capital base as well as the one-time adverse events.

Export revenues stood at ₹ 470.84 crores, while domestic revenues came in at ₹ 734.67 crores. Export and domestic market contributed 61% and 39% of total revenues for the year, respectively. USA, Europe and Asia continue to contribute to the bulk of the export revenues with contribution of 19%, 54% and 22%, respectively.

In order to reinforce its strategic objectives in recognition of continued transformation of the portfolio, your Company has, during the year renamed its Bulk Chemicals and Commodities segment as 'Basic Chemicals' and the Fluorescent Whitening Agents segment

as 'Performance Products' segment. The Performance Products segment includes an expanding range of products. Details of each Strategic Business Unit (SBU) are underlined below:

BASIC CHEMICALS (BC)

Basic Chemicals segment reported steady performance during the year. While demand for fuel additives went down, your Company moved production to other products giving better contribution, though topline was impacted. This segment will witness healthy momentum going forward due to enhanced product mix as well as addition of new category of products and also good demand from end user industries.

FINE & SPECIALITY CHEMICALS (FSC)

Fine & Speciality Chemicals include agro, pharma and personal care intermediates. This segment reported de-growth in revenues as well as volumes due to the unfortunate fire incident at Roha. Going forward, FSC segment is expected to exhibit strong growth as processing capabilities for pharma and personal care intermediates have been enhanced to capitalise on healthy demand. Visibility of improved traction in agro intermediates is also expected to provide a fillip to the growth of the segment.

PERFORMANCE PRODUCTS (PP)

Performance Products segment includes direct sales of Diamino Stilbene Disulfonic Acid (DASDA) from the Hyderabad facility as well as Optical Brightening Agents (OBA) revenues from Dahej. The shutdown of the Hyderabad facility due to floods impacted the volumes and profitability of PP segment. New investments are being made in the PP segment, whose impact will be seen in the upcoming years. As you would be aware, we are the only fully integrated OBA player in the industry and this gives your Company a competitive edge over other players. Your Company has diversified its focus on export markets and end-user industries to accelerate growth.

EXPANSION PLANS

In FY 2016-17, your Company, through its wholly-owned subsidiary, Deepak Phenolics Limited made significant progress in its project at Dahej, to manufacture 200,000 MTPA of Phenol and 120,000 MTPA of its co-product Acetone. This will be supported by manufacturing 260,000 MT of Cumene, which is a feedstock for manufacturing Phenol and Acetone. This greenfield project is expected to be commissioned in the second half of the current financial year. For this, the overall capital outlay will be approximately ₹ 1,400 crores. I am glad to underline that your Company has tied up the

long-term debt to finance this project and also made further progress in raising Equity funds needed to the tune of ₹ 150 crores through the second round of Qualified Institutional Placement (QIP) which was concluded in March 2017. Success of this round of QIP signifies awareness of investors in great potential of Phenol / Acetone project. We believe in being with the investors and take them along with us in creating a new big petrochemical venture. This is in addition to Equity funds already raised in Phase I of the QIP in FY 2015-16 and sale of land at Pune concluded in early FY 2016-17. The project team has shown excellent team efforts in executing the project.

Your Company will address the opportunity offered by the supply deficit in the domestic market which is currently met by imports. In addition to competitiveness on cost due to supplying the domestic markets from a plant located in India, your Company will leverage the latest manufacturing technologies in its state-of-the-art plant which will reduce wastage and is more efficient in utilisation of inputs and energy.

With the objective of developing working relationships with major clients across India and accelerating its market presence, your Company has

already started seeding of Phenol in the domestic market to establish strong marketing and distribution channels ahead of the commencement of manufacturing at its plant. Further, the supply of benzene, a key raw material has become significantly easier in the domestic market thereby enhancing the prospects for the mega phenol project further.

OUTLOOK

Overall, your Company remains confident and continue to see several opportunities in the speciality chemicals space for widening its portfolio of value-added products as customer demand and acceptance remains robust. Your Company is confident of growth from each one of its segments on the back of improving market conditions and a buoyant pipeline of products. While your Company will bounce back from the setbacks in FY 2016-17, the management has also put in place steps to enhance operating efficiencies, which will allow your Company to scale

new heights in performance. Lastly, the contribution of the Phenol project, scheduled to be commissioned in the second half of FY 2017-18 is expected to be transformational.

On behalf of the Board of Directors, I would like to take this opportunity to acknowledge the entire team of your Company for their contribution and commitment. Lastly, I would like to extend my sincere gratitude to all our business partners and associates for their confidence through the years and count on their support going forward.

Best wishes,

Deepak C. Mehta
Chairman & Managing Director

ABOUT DEEPAK PHENOLICS

Sensing a huge untapped opportunity to cater to the domestic demand for Phenol and Acetone, due to their conspicuous domestic production deficit, Deepak Nitrite Limited (DNL) took a strategic investment decision to manufacture these products domestically, through its wholly-owned subsidiary, Deepak Phenolics Limited.

PHENOL

Phenol is used in the manufacture of a large range of commercial products. It is consumed in laminates, automobile, foundry, paints, rubber, surfactants, pharma, agro-chemicals, etc.

Moreover, around 100,000 tpa of Phenol is being imported in the form of derivatives which go for infrastructure products, epoxy resins, polycarbonates, etc.

Phenol consumed in India increased at a CAGR of about 7%, from nearly 200,000 MT in FY 2010-11 to 280,000 MT in FY 2015-16. While this consumption was largely driven by the phenolic resins industry, which accounts for 76% of Phenol consumed in India,

other end-user industries include drugs and dyes, alkyl phenol, agro chemicals, etc.

The demand for phenolic resins industry has seen a robust growth of 7-8% over the past five years, on the back of rising automobile sales in the domestic market as well as a healthy rise in exports. The plywood and laminates industry has also grown at a rapid pace with the growth of the underlying construction and housing industry.

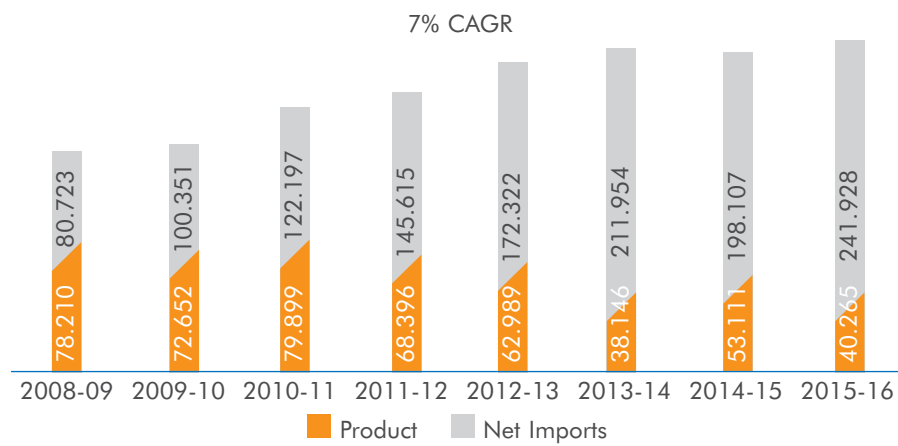

Against this backdrop of increasing demand, the import component has been steadily rising at a CAGR of 15% between FY 2010-11 and FY 2015-16. On the one hand, the domestic capacity has been largely stagnant at 80,000 MTPA, with no capacity additions for the past 7-8 years. At the same time, the capacity utilisation rate of domestic manufacturers has fallen from 100% in FY 2010-11 to 50% in FY 2015-16. As a result, domestic supply has been able to meet only 12% of domestic demand in FY 2015-16 compared to 45% in FY 2008-09. Domestic capacities stagnated

with two sub-optimal plants with around 30,000 - 40,000 tpa, hence the country's demand has been more than met with imports. Other factors that have tilted the scales in favour of imported phenol have been the difference in the domestic and landed cost due to uneconomical cost structures for domestic players and a rise in the operating costs of domestic producers which have led to a fall in margins and therefore, continued losses. It has been an experience of the industry that free domestic availability significantly boosts consumption.

ACETONE

Acetone is predominantly used in the production of pharmaceuticals, paints, adhesives and thinners, etc. The consumption of acetone has increased at a CAGR of about 4% from around 125,500 MT in FY 2010-11 to 152,425 MT in FY 2015-16 on the back of steady to good growth in user industries such as the pharma industry, paints and adhesives and other key sectors including Aldol chemicals, Methyl Methacrylate (MMA), etc. In future, the Acetone

DOMESTIC CONSUMPTION OF PHENOL (IN MT)

demand in India is slated to grow at a faster CAGR of 5-7% between FY 2015-16 and FY 2020-21. This does not include imported downstream like BPA, MMA, etc.

In the case of acetone too, the quantum of imports has been increasing at a CAGR of 12% between FY 2010-11 and FY 2015-16. This is due to the fact that the domestic capacity of acetone, which stands at 48,000 MTPA, is incapable of meeting rising demand. At the same time, there is a difference between the domestic and landed cost of the product that makes it more economical to import the product. Accordingly, imports as a percentage of consumption increased from 60% in FY 2008-09 to 91% in FY 2015-16. This, in turn, led to a decline in domestic acetone production and a capacity utilisation of about 52% in FY 2015-16. As a core sector, large

DOMESTIC ACETONE CONSUMPTION TREND (IN MT)

UOP Honeywell. Globally, more than 60% of Phenol project has used technology from these two giants. While M/s. Thyssen Krupp Industrial Solutions (India) Pvt. Ltd. has been assigned in the Engineering, Procurement, and Construction Management (EPCM) contract. As most of the basic engineering work is completed, and the project implementation is on schedule, orders for major long lead items have already been placed or are in process of negotiations. Further, with an objective to test the Phenol market and also develop working relationships with major clients across India, Deepak Phenolics has already started seeding phenol in the key markets and the response so far has been as per expectations.

Further, availability of two key raw materials i.e. Benzene and Propylene is immensely helping this project.

India currently produces ~50,000 MT of phenol while close to 225,000 MT being imported in order to meet the overall demand. With phenol imports remaining strong, the country's current demand will absorb the entire capacity that Deepak Phenolics plans to install. In addition, changing consumption trends of end-user industries will further boost this momentum.

Likewise, Indian acetone production stands at ~30,000 MT, whereas close to 140,000 MT is imported. Deepak Phenolics' upcoming phenol and acetone plant, expected to be completed in the second half of FY 2017-18, will thus help bridge this gap and give your Company a market leadership position in India.

With the commissioning of the Deepak Phenolic's plant and the addition of 200,000 MTPA capacity that it will deliver, the proportion of imports of phenol in domestic consumption are likely to fall from 88% in FY 2015-16 to 48-52% in FY 2020-21.

pharma industry base has been one of the country's strength over the years. This makes a stronger business case favouring Acetone. Apart from this, new generation paints, adhesives and rubber chemicals, in both domestic and exports, also favours strongly our Acetone project.

DEEPAK PHENOLICS – A LANDMARK SOLUTION

In an effort to tap the opportunity to cater to the growing domestic demand and facilitate import substitution, Deepak Phenolics is setting up a green field plant to manufacture phenol and acetone at Dahej, Gujarat. The capacity of phenol plant is 200,000 MTPA and that of acetone is 120,000 MTPA. Deepak

Phenolics will also be manufacturing 260,000 MTPA of cumene which is a feedstock for phenol and acetone. At a total outlay of ₹ 1,400 crores, the project is being funded through a combination of debt and equity. The debt portion of ₹ 840 crores for the project has already been tied up, while the balance ₹ 560 crores will be funded by DNL by way of Equity or preference shares in Deepak Phenolics. Out of this ₹ 560 crores, DNL has already invested ₹ 280 crores in Deepak Phenolics for the project.

Technology for Phenol and Acetone has been sourced from Kellogg, Brown & Root International, Inc and technology for Cumene has been sourced from

CARING FOR OUR COMMUNITY THROUGH CSR ACTIVITIES

During the year, your Company has undertaken various CSR initiatives through the Deepak Foundation – group’s charitable arm. These encompass social interventions in various developmental domains, such as Health, Education, Livelihood, etc. as explained below:

IMPROVING LASTMILE REACH OF GOVT. PROGRAMMES THROUGH SUPPORTIVE SUPERVISION OF ANGANWADIS

Under this initiative, your Company provided supportive supervision and monitoring services to over 6,000 children in 65 Anganwadi centres of Vadodara rural block. Further, capacities of over 230 Anganwadi workers, helpers and nutrition counsellors were enhanced in counselling and pre-school education. A treatment centre for severely malnourished children was initiated at Deepak Medical Foundation Hospital and 43 children were treated there. Your Company also undertook and completed infrastructure refurbishment of 10 Anganwadi centres, developing them as Model Anganwadis. Last, but not the least, counselling services were provided to nearly 3,000 pregnant and nursing mothers.

IMPROVING AVAILABILITY & ACCESSIBILITY OF QUALITY OCCUPATIONAL HEALTH SERVICES IN GIDC

Under the Deepak Medical Foundation, the Deepak Occupational Health Centre was fully equipped, set-up and initiated to provide comprehensive occupational health services through trained medical and paramedical staff. It also entails fully functional laboratory and pharmacy facilities. The centre caters to 79 industries/clients and has trained over 1,000 participants through industrial training and 550 participants through substance abuse awareness sessions. Over 4,000 medical checkups were also conducted and about 1,450 employees were reached through specialised camps during the year.

DELIVERING QUALITY CARE IN TRIBAL AREAS

The Deepak Foundation, in partnership with the Govt. of Gujarat, implemented a Comprehensive Emergency and New born Care unit that serves over 900,000 people from local tribes. As a part of this initiative, it conducted over 2,700 deliveries, including over 600 which were high risk. During the year, the unit introduced laparoscopy services for conducting low risk and minimal invasive surgical procedures and is one of the first Community Health Centres in the tribal district of Gujarat to introduce such an advanced surgical procedure, which otherwise is available only at tertiary or private healthcare institutions.

PROVIDING QUALITY HEALTHCARE THROUGH DOORSTEP DELIVERY OF SERVICES

Continuing with your Company's tradition of active community service in the catchment areas of its industrial plants, Mobile Health services are being provided to reach out to the underserved communities and facilitate access to quality primary healthcare services within the communities. Over 23,000 beneficiaries from 25 villages were directly benefited from the medical services provided through the Mobile Health Unit, Roha. The Mobile Health Unit, at Dahej, which caters to a population of 48,000 across 37 villages, covered about 23,500 beneficiaries through out-patient treatment services.

SAVING LIVES BY FACILITATING ACCESS TO TIMELY MEDICAL INTERVENTION & SERVICES

Recognising the importance of timely access to treatment and other services, 24*7 Citizen Help Desk services are being provided at the district hospital, in Vadodara. In FY 2016-17, 36,700 patients seeking care at the hospital were extended support services through the Help Desk and 284 patients were provided with blood and blood products. Blood donation camps were also organised and over 360 units of blood were collected.

PROMOTING LEARNING THROUGH MOBILE LIBRARY SERVICES

Mobile Library services were initiated in 25 villages in Roha to provide children from marginalised communities with the opportunity to access wide range of books and library services so that they could inculcate an interest for learning. The Mobile Library services received over 1150 memberships from children. Storytelling sessions, theme-based story narration competitions and other activity-based learning sessions resulted in 35% children showing improvement in their reading skills.

COMBATING TOBACCO & ALCOHOL DEPENDENCY THROUGH DE-ADDICTION & COUNSELLING SERVICES

Recognising the increasing dependency on addictive substances and the adverse effect it has on the quality of life of victims and their loved ones, de-addiction and counselling services were initiated in Hyderabad during the year with the objective of promoting quality of life through prevention of substance abuse and facilitating professional services for the addicts.

Over 23,000 beneficiaries were reached and over 250 identified addicts were provided individual counselling. As a result of vigorous follow-up counselling of the addicts ingrained within the community approach, 5 beneficiaries have been completely rehabilitated.

INCREASING EMPLOYABILITY THROUGH WAGE EMPLOYMENT TRAININGS

Modestly educated, unemployed youth from disadvantaged sections of the society of Chhota Udepur, Gujarat and Hyderabad were facilitated to attend government-approved courses in 'Home Health Aide'. Training at these courses served the objective of providing wage employment to the age group between 18-45 years of the population, thereby equipping them with skills for income generation. Over 275 beneficiaries received such training during the year and 110 have successfully completed the programme with 59 candidates securing job placements.

DEMONSTRATION OF WATER HARVESTING STRUCTURES IN THREE VILLAGES OF ROHA BLOCK OF RAIGAD DISTRICT

Complementing the Mobile Health services and Mobile Library service, a need was felt to initiate water resource development in the intervention area. For a comprehensive approach, this initiative was linked to the health and education services, with livelihood and water conservation issues. Your Company undertook the creation of water harvesting structures in three villages - Gosale, Nivi Thakur Wadi and Warathi. During FY 2016-17, basic structures were created and now pitching, plastic lining and fencing have also been completed. Though the pitching is yet to stabilise, each farm pond, which has a holding capacity of over 50,000 litres, provides water for 3-4 months more than before. Various crops like paddy, beans, cow pea, green gram, bengal gram, water melon, brinjal, potato, onion, and lady fingers are expected to benefit from the irrigation support and the water from the pond is also used for drinking by the livestock. In addition, one of the beneficiaries has gained nearly ₹10,000 from introducing fishery into the pond.

NOTES:

1. A statement pursuant to Section 102 of the Companies Act, 2013 with respect to the Special Business set out in the Notice is annexed.
2. A MEMBER ENTITLED TO ATTEND AND VOTE AT THE ANNUAL GENERAL MEETING IS ENTITLED TO APPOINT

A PROXY TO ATTEND AND VOTE ON A POLL INSTEAD OF HIMSELF / HERSELF AND THE PROXY NEED NOT BE A MEMBER OF THE COMPANY.

The instrument appointing the Proxy, in order to be valid and effective, should be lodged / deposited with the Company at its Registered Office not less than 48 (forty eight) hours before the commencement of the Annual General Meeting ("the Meeting").

A person can act as a Proxy on behalf of Members not exceeding 50 (fifty) and holding in the aggregate not more than 10% (ten percent) of the total share capital of the Company carrying voting rights. A Member holding more than 10% (ten percent) of the total share capital of the Company carrying voting rights may appoint a single person as Proxy and such person shall not act as a Proxy for any other person or Member.

3. Corporate Members intending to send their authorised representatives to attend the Annual General Meeting are requested to send to the Company a certified copy of the Board resolution authorising their representative to attend and vote on their behalf at the Meeting.
4. Members / Proxies are requested to bring duly filled Attendance Slip to attend the Meeting, along with their copy of Annual Report.
5. The relevant documents referred to in this Notice requiring the approval of the Members at the Meeting shall be available for inspection by the Members at the Registered Office of the Company on all working days, except Saturdays and Sundays, during business hours, up to the date of the Meeting.

This Notice and the Annual Report will also be available on the Company's website www.deepaknitrite.com for download.

6. The Register of Members and Share Transfer Books of the Company will be closed from Monday, June 19, 2017 to Friday, June 23, 2017 (both days inclusive).
7. The dividend as recommended by the Board of Directors, if approved at the Meeting, will be paid within statutory time limit of 30 days, as under :
 - (a) To all Beneficial Owners in respect of shares held in dematerialised form as per the data made available by the National Securities Depository Limited and Central Depository Services (India) Limited as at the close of business hours on June 19, 2017.
 - (b) To all Members in respect of shares held in physical form after giving effect to valid transfers in respect of transfer requests lodged with the Company on or before the close of business hours on June 19, 2017.
8. Members holding shares in dematerialised mode are requested to intimate all changes pertaining to their

bank details, National Electronic Clearing Service (NECS), Electronic Clearing Service (ECS), mandates, nominations, power of attorney, change of address/name, e-mail address, contact numbers, etc. to their Depository Participant (DP) only, and not to the Company's Registrar & Share Transfer Agent.

Changes intimated to the Depository Participant will then be automatically reflected in the Company's records which will help the Company and its Registrar & Share Transfer Agent to provide efficient and better services to the Members.

9. Members holding shares in physical form are requested to intimate all changes pertaining to their bank details, National Electronic Clearing Service (NECS), Electronic Clearing Service (ECS), mandates, nominations, power of attorney, change of address / name, etc. to the Company's Registrar & Share Transfer Agent, quoting their Registered Folio Number. The Bank Account particulars of the Members will be printed on the Dividend Warrant.
10. Members holding shares in physical form are requested to consider converting their shareholding in dematerialised form to eliminate all risks associated with physical shares and for ease of portfolio management. Members can contact the Company or the Company's Registrar & Share Transfer Agent for assistance in this regard.
11. Members seeking any information with regard to the Annual Accounts are requested to write to the Company at an early date, so as to enable the Management to keep the information ready at the Meeting.
12. In terms of the provisions of Section 124 and other applicable provisions of the Companies Act, 2013, the amount of dividend not encashed or claimed within 7 (seven) years from the date of its transfer to the unpaid dividend account, will be transferred to the Investor Education and Protection Fund established by the Central Government. Accordingly, the unclaimed dividend in respect of Financial Year 2009-10 is due for transfer to the said Fund in August, 2017. Members who have not yet encashed their dividend warrant(s) pertaining to the dividend for the Financial Year 2009-10 onwards, are requested to lodge their claims with the Company for the same.

Attention of Members is invited to the provisions of Section 124(6) of the Companies Act, 2013 read with Investor Education and Protection Fund Authority (Accounting, Audit, Transfer and Refund) Rules, 2016 amended from time to time, which *inter alia* requires the Company to transfer the equity shares on which the dividend has remained unpaid or unclaimed for a continuous period of seven years, to a special demat account to be opened by Investor Education and Protection Fund Authority ('IEPF

Authority'). The said Shares, once transferred to the said demat account of the IEPF Authority can be claimed after following due procedure prescribed under the said IEPF rules.

The Company has intimated individually all such shareholders, dividend on whose shares has remained unpaid for a continuous period of seven years and a notice in this regard has also been published in the Indian Express (English) and the Financial Express (Gujarati) Ahmedabad edition on April 5, 2017. The Statement of Unclaimed Dividend amount for 7 consecutive years and Shares due for transfer to IEPF Demat Suspense Account is placed on the website of the Company at <http://deepaknitrite.com/pdf/results/Details%20Shareholders%20for%20IEPF%20Demat%20Suspense%20account.PDF>

Members are therefore requested to approach the Registrar and Share Transfer Agent of the Company to claim their unpaid dividend, if any.

13. The Notice of the Annual General Meeting along with the Annual Report for the Financial Year 2016-17 is being sent by electronic mode to those Members whose e-mail addresses are registered with the Company / Depositories Participant, unless any Member has requested for a physical copy of the same. For Members who have not registered their e-mail addresses, physical copies are being sent by the permitted mode.

The route map showing directions to reach the venue of the Meeting is provided in the Notice after the Explanatory Statement.

14. To support the 'Green Initiative', the Members who have not registered their e-mail addresses are requested to register the same with the Company's Registrar & Share Transfer Agent/ their respective Depository Participants. Members whose email ids are already registered may update the changes therein, if any. This may be treated as an advance opportunity in terms of proviso to Rule 18(3) (i) of the Companies (Management and Administration) Rules, 2014.
15. The Securities and Exchange Board of India (SEBI) has mandated the submission of Permanent Account Number (PAN) by every participant in securities market. Members holding shares in electronic form are, therefore, requested to submit their PAN to their Depository Participants with whom they are maintaining their demat accounts. Members holding shares in physical form can submit their PAN to the Company/ Company's Registrar & Share Transfer Agent.
16. In compliance with the provisions of Section 108 of the Companies Act, 2013 and Rule 20 of Companies (Management and Administration) Rules, 2014 as amended, and Regulation 44 of SEBI (Listing Obligations

and Disclosure Requirement) Regulations, 2015 ('LODR' or 'Listing Regulations'), the Company is pleased to provide the facility to Members, to exercise their right to vote on Resolutions proposed to be considered at the Meeting by electronic means and the business may be transacted through such voting.

17. Members, whose names appear in the Register of Members / list of Beneficial Owners as on June 19, 2017 ("Cut-off Date") are entitled to vote on the Resolutions set forth in this Notice. A person who is not a Member as on the Cut-off Date should treat this Notice for information purposes only.
18. The Company has entered into an arrangement with Central Depository Services (India) Limited ("CDSL") for facilitating remote e-Voting for the Meeting. The Members may cast their votes on electronic voting system to be provided by CDSL from place other than the venue of the Meeting ("remote e-Voting"). The remote e-Voting will commence on June 23, 2017 (9:00 a.m.) and will end on June 25, 2017 (5:00 p.m.). The remote e-Voting module shall be disabled by CDSL for voting thereafter. Once the vote on a Resolution is cast by the Member, he/she shall not be allowed to change it subsequently. The Members desiring to vote through remote e-Voting are requested to refer to the detailed procedure given herein in the Notice.
19. In addition, the facility for voting through Polling Paper shall be made available at the Meeting and the Members attending the Meeting who have not cast their vote by remote e-Voting shall be able to exercise their right at the Meeting through Polling Paper.
20. Members who have cast their vote by remote e-Voting prior to the Meeting may also attend the Meeting but shall not be entitled to cast their vote again.
21. In case of joint holders attending the Meeting, only such joint holder who is higher in the order of names will be entitled to vote.
22. The voting rights of Members shall be in the proportion of their shareholding in the Company as on Cut-off Date.
23. The Company has appointed Shri Dinesh Joshi, Practising Company Secretary (Membership No.: FCS 3752), Partner, M/s. KANJ & Associates, Company Secretaries, Pune, as the Scrutinizer, to scrutinize the entire voting process including remote e-Voting in a fair and transparent manner.

MANAGEMENT DISCUSSION & ANALYSIS

GLOBAL SCENARIO

The Financial Year ("FY") 2016-17 marked another challenging and eventful year for the world economy owing to sluggish global trade, subdued investment, heightened geopolitical uncertainty, regional protectionism and change of leadership in some of the leading global economies. There have been several impacting events like – election of new President in the USA, UK's protectionism through BREXIT, potential political insulation of other EU economies, entry of Iran in global oil supply, missile and nuclear testing by North Korea, tension in Indo-Pak border – all these are expected to have serious impact on world trade and commerce. Amidst all these, global growth was 2.3% in 2016, which is projected to improve only marginally to 2.7% in 2017 largely on the back of recovery in emerging markets and select developing economies. Growth in these markets, as well as some developed economies, is expected to pick up in 2017 on the back of improved commodity prices, resumption in investments, improved consumer confidence and increasing consumption on the back of pent up demand. The lack of decisive improvement in the investment climate continues to weigh on the medium-term prospects across many emerging markets and developing economies. However, fiscal stimulus and similar growth enhancing policies in major economies hold the potential to boost global growth above expectations.

Advances in major developed economies, including United States of America (USA) - the world's largest economy, will have positive repercussions on the rest of the world. Acceleration in USA's growth due to expansionary fiscal policies and the attempts to accelerate infrastructure spending could provide a major boost to the global economy. Major advanced economies reported muted growth at 1.6% in 2016 due to policy uncertainties, weak external demand and subdued productivity growth. While this is expected to recover in FY 2017-19, uncertainty around policies of the new administration in USA and United Kingdom's (UK) decision to leave the European Union (BREXIT) will certainly influence the growth trajectory going forward. On the other hand, devaluation of Chinese Yuan, change in Chinese fiscal, business and social policies may play a major role in world commerce and economy.

Emerging markets and developing economies account for more than one-third of the global GDP and about three-quarters of the world's population. Any slowdown in these economies can have a consequent effect on the developed nations. Weak investments in these economies pose a significant challenge. While policy priorities depend on country circumstances, policymakers are progressively employing full range of cyclical and structural policies to accelerate investment growth in these countries.

Emerging market and developing economies (EMDEs) grew at an estimated 3.4% in 2016, broadly in line with expectations. This rate is expected to accelerate to 4.2% in 2017 and to an average of 4.7% in 2018-19. These economies are expected to account for about 60% of global growth for the first time since 2013. With an expected increase in commodity prices, particularly for crude oil, the divergence in growth outlook between commodity exporters and importers is set to narrow. The long-term prospects of EMDE would depend on host of aspects, the most prominent being uncertainty about global trade prospects and advanced economy policies, weakening in potential output resulting from subdued investment, lower productivity growth, and demographic factors.

Expected steady revival in global trade in 2017 and 2018 will be driven by likely rebound in import demand from large EMDEs. The pace of the recovery will, however, be slower than expected due to downward revisions of growth prospects in major advanced economies, persistent weakness in global investment, and slower trade liberalisation amid uncertainty about trade policy in the United States and Europe. While the overall trend for growth in the global economy continues to point upwards, the pace of growth is likely to be moderate in the immediate term. DOMESTIC SCENARIO

During the first half of FY 2016-17, India's growth was supported by strong private and public consumption, which compensated for the moderated fixed investment, sluggish industrial activity and continued slow down in exports. While the economy is yet to emerge from the cyclical downturn in infrastructure spending and asset creation, India is estimated to continue to grow at a lively pace of around 7% in 2017 supported by low oil and commodity prices and robust agricultural output. Overall consumption was accelerated during the year due to lower energy costs, public sector remunerations and favorable monsoons, which boosted urban and rural incomes. A surge in foreign direct investment (FDI) and an increase in public infrastructure spending positively impacted the economic activity in the country. However, the momentum was momentarily impacted to some extent by the 'Demonetisation' initiative, which resulted in short-term disruptions, however, government actions brought back the economy into normalcy post a successful demonetisation move and implementation. In addition to this, downsizing in private investment, reflecting excess capacity, corporate deleveraging and credit constraints owing to impaired assets of commercial banks' had a cascading effect on the economy.

On the flip side, India witnessed passing of four crucial reforms namely Bankruptcy and Insolvency Code, 100% ownership in previously restricted sectors, Goods and Services Tax (GST) Amendment Bill and a monetary policy framework that includes setting up a monetary policy committee and agreeing on a flexible inflation target, with a 2% to 6% range. GST by far was one of the most critical reforms, which aims to streamline the country's complex indirect tax structure, reduce fragmentation in markets for goods and services, lower business costs and widen the overall tax base. Additionally, a monetary policy framework including setting up a monetary policy committee would help enhance the Reserve Bank of India's (RBI) operational independence, and help to anchor inflation expectations.

Over FY 2017-18, India is expected to be back on a strong growth path of 7.6% which would further strengthen to 7.8% in FY 2018 -19. A slew of reform initiatives undertaken in the past will unlock domestic supply bottlenecks and raise productivity. Adequate infrastructure spending including government expenditure would further improve the business climate and attract investments in the near-term. The Government of India's ambitious 'Make in India' initiative would further augment the manufacturing sector backed by domestic demand and further regulatory reforms. Modest inflation as well as service pay hike to support real income and consumption backed by likely bumper harvests and favourable monsoons are expected to provide a fillip to economic growth. Sustained benefit of demonetisation will lead to liquidity expansion and enhanced tax network in the system thereby helping to lower lending rates and lift economic activity.

INDUSTRY TRENDS AND OUTLOOK

The global chemical industry has been expanding at a steady pace over the past couple of years. Emerging Asian markets have become a new manufacturing hub for the global chemical giants largely led by China where chemicals sales have increased manifold. While China continues to dominate the global chemical market, the recent slowdown in the country, as well as instances of pollution and plant shutdown, has taken a toll on chemical manufacturing. This has given a commanding market position to other chemical majors from rest of Asia. India is an obvious beneficiary of this development given its market position in the global chemical market.

The Indian chemical industry is one of the most established and rapid growing sectors for the country. It plays a vital role in the economic development thereby serving as a critical input for the industrial and agricultural development. This sector has always witnessed considerable growth in the past and is currently poised to further this momentum. The Indian

chemical industry is the 3rd largest producer in Asia and 6th by output in the world. By 2020, the Indian chemical industry is projected to reach USD 226 billion. In terms of volume, the Indian chemical exports have shown a remarkable growth of 7.51% from 52.9 lakhs tonnes in FY 2014-15 to 56.9 lakhs tonnes in FY 2015-16, which is a positive sign.

India has become a global player in speciality chemicals, the market for which is expected to reach USD 70 billion by 2020. India's speciality chemical industry is highly fragmented, and growth is largely governed by domestic demand and exports in select segments. These chemicals are witnessing increased usage in customer-related industries such as agrochemical, pharmaceutical, automotive and textiles, with higher consumer demand for better quality and superior products. Key drivers such as innovation and sustainability initiatives have become major factors that determine competitiveness and have become the foremost priority of producers. 'Green Chemistry' and environmental preservation initiatives are widely accepted by the global counterparts.

The road map appears promising as India's chemical industry is poised for robust growth and investment on the back of solid domestic demand and robust export market. Key reform initiatives that would support growth in the chemical industry include the Government's 'Make in India' initiative that has altered policies to boost investments in the country, including the chemical industry; National Chemical Policy which has created an enabling framework to accelerate manufacturing of chemicals in order to meet growing internal and external demands as well as reduce dependence on imports. The upcoming years will provide an opportunity for domestic industry players to gain scale and consolidate, while the international players may set up a robust manufacturing base in the country.

COMPANY PERFORMANCE

In FY 2016-17, Total Revenue including Other Income stood at ₹ 1,225.50 crores as against ₹ 1,337.26 crores in FY 2015-16.

EBITDA came in at ₹ 149.08 crores in FY 2016-17, lower by 11% as compared to ₹ 168.22 crores in FY 2015-16. EBITDA was impacted by the loss of revenue due to one-off events which disrupted operations. On a normalised basis, EBITDA would have been higher with better margins due to an improved composition of higher value products in the revenue-mix. Raw material costs stood at ₹ 706.44 crores against ₹ 789.75 crores, down by 11%.

Profit Before Tax excluding exceptional items stood at ₹ 75.90 crores as compared to ₹ 91.33 crores in FY 2015-16. Profit

After Tax excluding exceptional items came in at ₹ 53.34 crores as compared to ₹ 65.15 crores in FY 2015-16. PAT performance could have been much better but for the one-time incidents which hindered the momentum. Including the gain of ₹ 74.97 crores arising from sale of land (Net of Tax ₹ 58.70 crores), reported PAT was ₹ 112.04 crores in FY 2016-17 compared to ₹ 65.15 crores in FY 2015-16. Depreciation and finance cost during the year stood at ₹ 42.28 crores and ₹ 30.89 crores respectively.

Due to continued sluggishness in international markets and prevailing trends in key customer markets like Europe and China, revenues from exports stood at ₹ 470.84 crores compared to ₹ 525.75 crores last year.

There were certain one-time incidents during the year which had a bearing on the performance of the Company. Excessive flooding in Hyderabad forced to pollution issues which led to a temporary closure of one of the three units at the Hyderabad facility. Further, an accidental fire at one of the distillation columns of your Company's manufacturing facility at Roha impacted performance. Due to these multiple non-recurring events, the overall volumes declined by 4%. Further, lingering effects of the re-pricing of products due to volatile crude oil prices and related petrochemical intermediates also impacted the revenue momentum. While your Company witnessed encouraging demand in some of the key products, demand in fuel additive products contracted due to change in the dynamics of the oil supply market. In the domestic market, towards the end of the year, there was some disruption in demand in end-user industries of certain customers as a result of the demonetisation initiative.

Your Company is adequately covered under insurance for replacement value of the damaged facilities and loss of profits due to business interruptions for the losses it suffered due to the incident of fire at its Roha unit.

There were several positives as your Company witnessed encouraging demand in some of its key products and witnessed favourable trends in newer products launched in the complementary sub-segments. Encouragingly, your Company was able to incorporate a turnaround in its performance in the fourth quarter driving a rapid recovery from impact of the developments which took place in the third quarter through diversification in products, geographies, customer segments and end-user industries. As a strategy, your Company has been diversifying its products and end-user industries in such a manner that downturn in a particular end-user segment is compensated by gains in another end-user segment.

As a part of ongoing transformation in mind, your Company has during the year renamed its Bulk Chemicals and Commodity

segment as 'Basic Chemicals' and the Fluorescent Whitening Agents segment as 'Performance Products' segment. With this, the product portfolio now comprises of expanded range of offerings thereby helping your Company to further strengthen its position in the market.

Notwithstanding the challenges to performance during the year, your Company declared dividend of ₹ 1.20 (Rupees One and Paise Twenty only) per Equity Share of a Face Value of ₹ 2 (Rupees Two only) each, thus continuing its rich legacy of creating value for Shareholders. The Dividend rate has been maintained despite expanded capital base (due to QIP concluded in the last quarter of FY 2016-17) as well as one-time adverse events.

PERFORMANCE OF STRATEGIC BUSINESS UNITS

Basic Chemicals

In Basic Chemicals (renamed from Bulk Chemicals and Commodities), your Company manufactures Nitro Toluenes, Ortho Toluenes, Fuel Additives, Sodium Nitrate and Sodium Nitrite. These chemicals are used for applications across colourants, rubber chemicals, explosives, dyes, pigments, food colours, pharmaceuticals, petrol & diesel blending and agrochemicals among others. These chemicals are supplied in high volumes and are subject to moderate margins. Your Company manufactures these chemicals as per standard specifications, with superior quality through process excellence across each product. The focus is on cost leadership to drive volume growth and profitability.

In FY 2016-17, revenues for Basic Chemicals stood at ₹ 634.57 crores compared to ₹ 674.56 crores for FY 2015-16. This segment contributed 51% to total revenues during the year, with EBIT margin of 14%. The volumes declined by 4%. While business of Fuel Additives was subdued during the year, the same production lines could have been utilised for producing other contributory products during the year which gave boost to the margin in this business segment.

Fine and Speciality Chemicals

The Fine and Speciality Chemicals segment comprises of niche products that require more value addition. Under Fine and Speciality Chemicals segment, your Company manufactures Speciality Chemicals, Xylidines, Oximes, Cumidines and Nitro Oxylene amongst others. These chemicals are used as intermediates in colourants, pigment, agro chemicals and pharmaceuticals. These products are customised as per specific customer requirements and manufactured in low volumes. As they are non-standardised products and enjoy higher value, the focus is based on quality of product, long-

term relationships, stable and sustainable operations as well as global best practices for suppliers and customers.

Revenues from Fine and Speciality Chemicals stood at ₹ 359.36 crores for FY 2016-17 compared to ₹ 393.37 crores for FY 2015-16. This segment contributed 30% to the total revenues during the year. The EBIT margin stood at 23.7% in FY 2016-17. The performance in the Fine and Speciality Chemicals segment was impacted due to interruption in operations during the second half of FY 2016-17 owing to fire in one of the distillation columns.

Performance Products

Fluorescent Whitening Agent segment has been renamed to Performance Products segment in order to transform the product portfolio and include a wide range of products. Performance Products is an application chemical. Major constituent of this segment is Optical Brightening Agent (OBA), which is used in varied industries like Paper, Detergents, Textiles, Coating applications in Printing and Photographic paper. These products are offered to the customers as per their desired specification across liquid, solid and powdered forms. Your Company is the world's only fully-integrated manufacturer of Fluorescent Whitening Agent having vertical integration from Toluene to PNT and further into DASDA and OBA. The Performance Products segment has an innovation-led team in place and there are application labs in all segments for testing and post-sales support. Your Company has a wide network of global clientele for Performance Products supplies and it enjoys a competitive advantage over peers due to its vertical integration from Toluene to OBA. This helps your Company to customise raw material at each process depending upon the customer requirement, resulting in superior quality. Your Company would continue to benefit from the steady demand in the end-user industries, with better customer acceptance.

In FY 2016-17, revenues from Performance Products segment stood at ₹ 240.09 crores compared to ₹ 273.68 crores in FY 2015-16. This segment contributed 19% to total revenues during the year. The performance has to be seen in the light of the one-time incident in the form of plant closure due to excessive flooding in Hyderabad.

Geographic Performance

Domestic revenues stood at ₹ 734.67 crores, while export revenues amounted to ₹ 470.84 crores in FY 2016-17. The mix between domestic and exports market stood at 61% and 39% respectively. Europe continues to be the largest export market for your Company, contributing close to 54% to the total export revenues, followed by USA and Asia which contributes 19% and 22%, respectively.

STRATEGIC INITIATIVES AND EXPANSION PLANS

Your Company has commenced a major project to set up a state-of-the-art plant for the manufacture of 200,000 MTPA of Phenol and 120,000 MTPA of its co-product Acetone. This will be supported by manufacturing 260,000 MT of Cumene, which is primarily used as a feedstock for Phenol and Acetone production. A wholly owned subsidiary, viz. Deepak Phenolics Limited has been set up for this project. This greenfield project is expected to be commissioned in the second half of the FY 2017-18 in Dahej in the State of Gujarat. The overall capital outlay for this project is approximately ₹ 1,400 crores, which is being funded through a combination of Debt and Equity. Your Company has already tied up the entire debt portion of ₹ 840 crores, while the Equity funds are being raised and deployed in a progressive manner, your Company has made significant progress in raising equity for the project as it secured funds to the tune of ₹ 150 crores through phase II of Qualified Institutional Placement (QIP) which was concluded in March 2017. This is in addition to equity funds already raised in Phase I of the QIP and sale of parcel of land in FY 2015-16 and FY 2016-17, respectively.

Phenol and Acetone are basic organic chemicals. Phenol is an aromatic compound derived from Cumene, a Benzene and Propylene derivative. Phenol is primarily used in the manufacture of various commercial products and finds applications in Laminates, Paints and Automobile lining foundry, surfactants, pharma, agrochem, etc. among others, while Acetone finds applications in Pharmaceuticals, Paints, Adhesives & Thinners, Acrylic sheets, etc. As per the current estimates, India imports more than 80% of total Phenol and Acetone requirements. Once this greenfield project is commissioned, it will help substitute the imports and enable the country to save foreign exchange while creating jobs within the country. Further, the size and scale of the project will position your Company for market leadership in India in Phenol and Acetone. Additionally, availability of Benzene, a key raw material has improved significantly in the domestic market thereby enhancing the prospects for the mega Phenol project further.

In addition to cost-competitiveness due to supplying to the domestic market from a plant located in India, your Company will leverage the latest manufacturing technologies in its state-of-the-art plant which will reduce wastage and is more efficient in utilisation of inputs and energy.

Your Company has sourced technology for manufacturing Phenol and Acetone from Kellogg, Brown & Root International, Inc. (KBR) and for manufacturing Cumene from UOP Honeywell while M/s. ThyssenKrupp Industrial Solutions (India) Pvt. Ltd. (formerly known as UHDE) has been appointed as the EPCM

contractor. The project is being implemented and is progressing well as per schedule. It is expected to be commissioned in the second half of FY 2017-18.

With an objective of developing working relationships with major clients across India as well as establishing strong marketing and distribution channels, your Company has started seed marketing of Phenol to understand and penetrate the market.

SWOT ANALYSIS

STRENGTHS

Technical Capabilities

Your Company has been in this industry for several decades now. Over the years, your Company has indigenously developed technical capabilities in order to provide niche chemistries to its long standing customers. Your Company has expertise in multiple chemical processes right from nitration, to hydration to chlorination among others. On an ongoing basis, your Company executes complex and hazardous chemical processes with high success rates by leveraging its experience in indigenous development as well as its capability in developing, managing, storing and handling various types of chemicals in quantities ranging from few kilos to several tons. Your Company's knowledge in chemicals and competence provides a competitive edge and also gives comfort to the customers that the complex processes would be safely undertaken in a cost competitive manner while adhering to the highest standards of quality. Your Company's ability to develop new product application and to customise products to suit customer needs have helped in expanding its customer base and thereby enabling your Company to establish its leadership position.

Extensive Product Profile with Application Diversity

Your Company has consistently expanded its product portfolio to combat itself from a slowdown in a particular product or category. Wide portfolio of products across various chemical intermediates has varied applications across industries ranging from Agrochemicals to Rubber to Pharmaceuticals to Colourants and Textiles amongst others. Your Company's ability to provide custom manufacturing services with a competitive edge has helped to cater to host of chemical majors across the globe. This along with quality infrastructure at multiple locations and balanced exposure in domestic and export markets has ensured steady growth for your Company. Your Company also enjoys leadership position in some of the key products that it manufactures.

Proficient Management Team

Your Company is directed by an experienced and sound management team with robust domain knowledge and a keen understanding of the trends and shifts in the industry landscape. Apart from possessing a proven track record in the chemical intermediates industry, the management team has been instrumental in framing strategies to accelerate growth and improve market position. The senior management team has contributed to your Company's success, which has enabled your Company to be recognised for the quality of its products while adhering to the Code of Responsible Care and to ethical values and has also resulted in enhancing stakeholder value.

Strong Global Reach and Stickiness of Customers

Your Company exports its products to over 30 countries across 6 continents. Key export markets include USA, Europe and China with emerging presence across a host of other countries. Apart from widespread geographical reach, your Company is one of the most preferred suppliers to some of the leading companies, both in India and internationally. This is possible through a customer-centric approach as well as focus on quality, safety and consistency over the last so many years. Along with long-standing association with most of the large customers, your Company enjoys stickiness in the relationships. Diversified and comprehensive product portfolio and large customer base spread across several countries and customer categories, strengthen your Company to face headwinds, if any and dependence on any particular product, customer or geography.

Focus on Innovation

Innovation is one of the key strengths of your Company. It is deep-rooted in the DNA of your Company. The Company has an excellent Research & Development facility where existing products and processes are consistently evaluated to drive improvements in product quantity, process, efficiencies and cost savings. The development of new products has not only helped your Company to emerge as a market leader in several products, but also build a competitive edge over its peers.

WEAKNESSES

Non-availability of Alternate Energy Sources

The manufacture of chemicals requires consistently a high amount of energy in the production process. Your Company uses conventional fuels like coal, furnace oil, etc. for generation of power. Use of non-conventional energy like wind power, solar power becomes unfeasible as these alternate fuels have shortcomings like lack of reliability of continual supply,

inability to generate energy in large quantity, sizeable capital expenditure, availability at higher costs, etc. However, being amongst one of the 'Responsible Care' certified companies, your Company continues to focus sharply on improving power efficiencies at its facilities along with widening its scope of green endeavours.

High Volatility in Raw Materials Prices

Raw material forms a major component in the chemical processes. Volatility in the raw material prices is one of the main challenges faced by the industry. Unpredictability in the global prices of raw materials is directly linked to the prices of end products. This leads to frequent re-pricing of products and hence volatility has to be managed well owing to the time lag between price hikes and cost revision. High volatility remains an inherent weakness in the industry in crude based bulk chemicals.

Significant Currency Appreciation

Sharp appreciation in the currency could impact growth as competitive advantages vis-à-vis China could reduce thereby slowing the pace of shifting of volumes from China to India. Appreciation of Indian Rupee against US Dollar also lowers the export realisation thus impacting the export potential.

OPPORTUNITIES

Substituting Imports

Import substitution was the foremost intention of your Company when it was founded way back in the 1970s. The objective was to capture the opportunity from import substitution of Sodium Nitrite. The pursuit of opportunities after that increased manifold. Your Company is now executing a greenfield project at Dahej in the State of Gujarat for manufacturing of Phenol and Acetone. Through this project, your Company will address the opportunity offered by the supply deficit in the domestic market which is currently met by imports. Once this project is commissioned, it will help substitute the imports and enable the country to save foreign exchange and give a market leadership position to your Company in Phenol and Acetone in India.

Manufacturing Boost

With an objective to boost manufacturing in the country, the Indian Government launched the 'Make in India' campaign. The campaign has received encouraging response with several leading global companies coming forward to commit investments in the country. This initiative has given further impetus to the emergence of India as a manufacturing hub for the chemicals industry. Hence, given the cost competitiveness, your Company will capitalise on this opportunity and expand its presence across the developed markets.

Potential for Exports

The Government's ambitious 'Make in India' initiative has bolstered India's export competitiveness and further strengthened its position as a manufacturing hub for chemicals. India's emergence as a major export hub is already seen in various segments such as agrochemicals and colourants, in which a significant part of India's production is exported. In addition, slowing of Chinese chemical exports, with environmental issues leading to a shut down and relocation of chemical plants has benefited India's chemicals exports.

Favourable Government Policies

In addition to the 'Make in India' initiative, the Indian Government has taken various steps to improve the productivity and efficiency in the chemicals sector. Simple procedures for FDIs with 100% permissible investments together with tax deduction to promote Research & Development activities and formation of industrial clusters & parks will provide impetus to the sector. This along with focus towards rural economy and agriculture in the Union Budget 2017 is expected to drive incremental growth, which will further drive demand for the end-user products and therefore intermediates produced by your Company.

THREATS

Lack of availability of skilled manpower

Despite having a favorable demographic profile, labor and skill shortage continues to be one of the key concerns for the Indian chemical industry. The Government along with industry bodies are putting their best foot forward to have education and vocational training institutions for arming the manpower with the appropriate skill set. Your Company conducts regular training and development programs to upgrade its 'human capital' skills.

Obsolescence of Product and Processes

Obsolescence of products and existing manufacturing processes pose a threat to the global chemical industry. Swift technological transformations, changes in materials and innovation-driven changes in manufacturing process render existing products and processes obsolete. Latest technologies can affect the overall market dynamics and existing operations of the industry.

Slowdown in End User Industries

The slowdown in growth of end-user industries such as paints & coatings, agrochemicals, rubber, paper and textiles amongst others could impact the overall growth. However, your

Company has an ability to shift the manufacturing towards those products which enjoy better demand-supply dynamics thereby sustaining profitability and insulating the operations from slowdown in a particular product category.

OUTLOOK

Going into FY 2017-18, your Company is positively placed to capture the growth opportunities arising in the end-user industries. After certain one-time events which impacted the performance in the year gone by, your Company has restarted all but one of the facilities and remains confident of getting back to normalcy. All your Company's Strategic Business Units (SBUs) including Basic Chemicals, Fine and Speciality Chemicals, and Performance Products are expected to deliver accelerated growth in the forthcoming year owing to continued transformation in the product portfolio and steady recovery in demand.

Fine and Speciality Chemicals segment would lead the growth pack for your Company as a result of encouraging demand scenario in the global as well as domestic markets and higher contribution from recently launched personal care and pharma intermediates. This will be further supported by better off take in agrochemical intermediates due to increasing market share of agro-chemicals in the export markets as well as favorable agro-climatic conditions in the domestic market.

Performance Products segment which now includes a wide range of products is expected to demonstrate decent performance in the upcoming year led by several strategic initiatives undertaken by your Company in the past as well as better customer acceptance for Optical Brightening Agents (OBA). This will help improve the utilisation rates and profitability in the Performance Products segment.

In addition to the above initiatives, your Company expects the greenfield project of Phenol and Acetone to be commissioned in the last quarter of the current financial year thereby providing further stimulus for earnings expansion.

RISK MANAGEMENT

Risk Management is integral to the creation, protection and enhancement of Shareholder value. Risk Management ensures that the management controls all business processes undertaken by your Company by means of a well-defined framework. Your Company has laid down robust risk management framework essential for identification, assessment, monitoring and mitigation of various risks to ensure smooth flow of operations adhering to stringent guidelines.

Your Company's Risk Management practices focus on providing the highest degree of safety to employees, especially

at factories, where complex chemical processes are executed. To ensure maximum safety and security, your Company's machinery undergoes real time monitoring and regular inspections to ensure that the functionality of the machinery is up to date and does not pose any potential hazards that could cause accidents at the workplace. The work place is regularly re-assessed to ensure that all equipment and processes do not pose any potential hazard and meet adequate safety requirements.

Your Company understands the importance of Credit Risk Management and has set up a framework that proactively monitors and identifies new and existing customers' financial health to mitigate any risk. Raw material price risks are mitigated through proper inventory control system, procuring raw materials from different sources at competitive prices and by entering into formula based pricing with customers. Your Company uses financial hedging methods and tools to mitigate the risks of currency fluctuations. Environmental risks represent direct threat to public health and livelihood and it is your Company's responsibility to manage this risk through reduced emissions and treatment of effluents. Overall, your Company has emerged as an organisation that has strong focus on improving process predictability, reducing operational risk, enhancing product quality and improving overall performance.

INTERNAL CONTROLS

Your Company and the Management has established adequate Internal Control systems to ensure reliable financial reporting. Internal Controls also help in assessing, evaluating, safeguarding and shielding your Company from losses and unofficial use or deposition of assets. This ensures that your Company's resources are put to optimum use and all transactions are authorised, recorded and reported correctly to the Management. Your Company constantly refines and testifies its internal controls to ensure management effectiveness and efficiencies of operating procedures. Your Company always adheres to set guidelines and follows all Accounting Standards prescribed for maintenance of books of accounts and reporting of financial statements. These standards require appointed independent Internal Auditors to plan risk based audits and execute audits to assess the effectiveness of internal control over various areas of operations and financial reporting throughout the year. Summary of the observation by Internal Auditors is reported to the Audit Committee of the Board of Directors and corrective measures are taken. The Internal Control systems are designed to provide assurances on an ongoing basis so that the business operations function efficiently and ensure that applicable laws, rules, regulations and policies of your Company are followed and the reliability of financial reporting is safeguarded.

HUMAN RESOURCES

Talented manpower is the important enabler for a company to grow and maintain competitiveness. Your Company continues to maintain healthy, cordial and amicable relationship with all its employees across various levels and locations. Human resources are considered as the most significant and valuable asset for your Company and continuous commitment towards upgrading skills is a vital part of the human resource development programme of your Company. In order to maintain its leadership position in the industry, your Company focuses on technical expertise, training, innovation and customer satisfaction. This can be achieved through rigorous selection process which is implemented to attract skilled talent, followed by upgradation of their competencies.

Your Company continues to train employees across several functions connected to technical, behavioural /general and health, safety and general environment and ISO certification standards among others.

The total employee strength including top management stood at 1317 as on March 31, 2017.

CAUTIONARY STATEMENT

Certain Statements made in the Management Discussion and Analysis Report relating to the company's objectives, projections, outlook, expectations, estimates and others may constitute 'forward looking statements' within the meaning of applicable laws and regulations. Actual results may differ from such expectations, projections and so on whether express or implied. Several factors could make a significant difference to the Company's operations. These include climatic conditions and macroeconomic conditions affecting demand and supply, government regulations and taxation, natural calamities and so on, over which the company does not have any direct control.

PERFORMANCE REVIEW

The Financial Year ("FY") 2016-17 was a challenging year on multiple fronts, and your Company has delivered a resilient performance indicating robustness of the business model. The emphasis on quality and sustainability of operations, widening of portfolio of products, active customer engagement, focus on profitable products and a healthy mix of end-user industries and markets served has enabled it to emerge stronger and better positioned to capture the opportunities ahead.

The performance in FY 2016-17 should be viewed in light of the several challenges faced. The wave of regional protectionism has spread across the developed world and has increased the pitch for supporting local production to preserve jobs and has thus impacted growth in export markets. These were coupled with BREXIT and instability in EU region. The lingering effects of the depressed crude oil prices and resultant impact on petrochemical intermediates also continued to exert pressure on growth. Furthermore, re-entry of Iran as a global crude supplier improved the availability of higher grades of crudes thereby impacting demand for fuel additive products. At the

same time, prices of commodities were on the wane though they were thought to be reversing.

Apart from these developments, your Company encountered multiple headwinds in the form of temporary closure of one of the three units at its Hyderabad facility due to excessive flooding and the resulting issues related to pollution. The performance was further impacted by an accidental fire that broke out at one of the distillation columns of your Company's manufacturing facility for Fine and Speciality Chemicals intermediates at Roha Industrial Estate in Maharashtra. Both these events impacted the volume off take of key products in the Fine & Speciality Chemicals as well as the Performance Products segments. Apart from these major events, demonetisation also impacted performance of some of your Company's end user industries, which impacted your Company's operations temporarily though it recovered swiftly.

Against this backdrop, your Company has reported a resilient performance in FY 2016-17. Your Company recorded revenues at ₹ 1,221.56 crores in FY 2016-17 compared to ₹ 1,335.73 crores in FY 2015-16 and volumes declined by

4% due to one-time events which impacted the production as well as sales. That said, favorable product mix and aggressive marketing helped your Company to increase volumes towards the end of the year, especially in the established business segments partly offsetting this impact and enabling your Company to effect a turnaround from the impact of one-time events in October and November, 2016.

Further, your Company leveraged its strength to switch to enhance the volumes of value added products to mitigate impact from down-cycle of existing product categories.

Export markets contributed 39% to the total revenues, while contribution from domestic market came in at 61%. Export Revenue stood at ₹ 470.84 crores in FY 2016-17, lower by 10.6% compared to ₹ 525.75 crores last year a result of the multiple headwinds faced by your Company. Active efforts have been made by your Company to deepen its connect with customers in key export markets of Europe, USA and China. Going ahead, your Company will continue to work towards widening and deepening market presence to grow revenues from exports in absolute terms. Once the Phenol project is commissioned, the proportion of exports in overall revenue mix in the consolidated performance will reduce since Phenol and Acetone are meant for domestic consumption, being import substitution products.

Profit Before Tax excluding Exceptional Items stood at ₹ 75.90 crores as compared to ₹ 91.33 crores in FY 2015-16. Apart from the revenue impact due to one time events, your Company incurred certain one-time expenses as well as higher depreciation due to increase in asset base. Profit After Tax excluding Exceptional Items stood at ₹ 53.33 crores in FY 2016-17 compared to ₹ 65.15 crores in FY 2015-16. Earnings Per Share (excluding Exceptional Items) for FY 2016-17 stood at ₹ 4.55 per share (of face value of ₹ 2 each) on an enlarged capital base compared to ₹ 6.07 per share in FY 2015-16.

The road ahead appears encouraging as your Company foresees several opportunities in the Indian chemicals space. Following the unforeseen events, your Company has now restarted all the facilities at Roha except one and is confident of restoring the growth momentum. It is anticipated that all the three SBUs viz. Basic Chemicals, Fine & Speciality Chemicals and Performance Products segment will contribute positively to the performance. Your Company is confident of its prospects as the focus of strategies and efforts of the last few years has been to diversify and strengthen the business model and allow your Company to further elevate the growth trajectory by strengthening all of the growth engines.

A review of the performance during the year is given under the section "Management Discussion and Analysis Report".

ISSUE OF SHARES

During FY 2016-17, your Company, offered Equity Shares to the Qualified Institutional Buyers ("QIBs") on private placement basis through Qualified Institutions Placement ("QIP"), in accordance with Chapter VIII of SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2009. Accordingly, 1,44,23,076 Equity Shares of ₹ 2/- each were allotted to QIBs on March 7, 2017 at an issue price of ₹ 104.00 per Equity Share (including premium of ₹ 102.00 per Equity Share). The QIP issue proceeds aggregating to ₹ 150.00 crores will be utilised in accordance with the objects stated in the offer document. Pending utilization, the unutilised amount of issue proceeds have been invested in Liquid Mutual Funds.

Post issuance of Equity Shares under QIP, the issued, subscribed and paid-up capital of your Company has increased from ₹ 23.26 crores in FY 2015-16 to ₹ 26.14 crores in FY 2016-17.

DIVIDEND

Based on your Company's performance, the Board of Directors has recommended payment of dividend of ₹ 1.20 (Rupee One and Paise Twenty only) per Equity Share for the year ended March 31, 2017 on 13,07,11,266 Equity Shares of ₹ 2/- each, as against ₹ 1.20/- (Rupee One and Paise Twenty only) per Equity Share in the previous year.

The total sum of the dividend, if approved, including Corporate Dividend Tax, will be ₹ 18.88 crores (previous year ₹ 16.79 crores).

TRANSFER TO RESERVES

Your Company proposes to transfer ₹ 5.00 crores to the General Reserves out of the amount available for appropriation.

UPDATE ON PHENOL AND ACETONE PROJECT

As you may be aware, your Company is implementing a Greenfield project to manufacture Phenol and Acetone at Dahej in the State of Gujarat. This project is being implemented through Deepak Phenolics Limited ("DPL"), a wholly owned subsidiary of your Company. The capacity of the Phenol Plant will be 200,000 MTPA and that of co-product Acetone will be 120,000 MTPA. DPL would also be manufacturing 260,000 MTPA of Cumene, which is a Feedstock for manufacturing Phenol and Acetone. This project is expected to be commissioned in the second half of FY 2017-18 with total capital outlay of around ₹ 1,400 crores, to be funded through a combination of debt and equity.

The project once commissioned is expected to substitute the Phenol imports to India. India currently imports most of its Phenol requirements and the country's current demand will

absorb the entire capacity that DPL plans to install. With an objective of developing working relationships with major clients across India as well as establish strong marketing and distribution channels, DPL has already started seed marketing to understand the market dynamics and the response thus far has been encouraging.

FINANCE

Your Company follows stringent guidelines to efficiently manage its working capital requirements and maintain its debt at a reasonable level. Hence, debt / equity ratio stood at a healthy level of 0.78 times. With expansion also your Company strives to maintain healthy Debt:Equity ratio of not crossing 1.5 times, once the project starts generating revenue.

The overall capital outlay for this project is approximately ₹ 1,400 crores, which is being funded through a combination of Debt and Equity. Your Company has already tied up the entire debt portion of ₹ 840 crores, while the Equity funds are being raised and deployed in a progressive manner, your Company has made significant progress in raising equity for the project as it secured funds to the tune of ₹ 150 crores through phase II of Qualified Institutional Placement (QIP) which was concluded in March 2017. This is in addition to equity funds already raised in Phase I of the QIP and sale of parcel of land in FY 2015-16 and FY 2016-17, respectively.

Interest costs declined during the year due to repayment of debt, better negotiation of funding costs as well as reduction in the general softening of interest rate. Depreciation increased due to regular growth and maintenance Capex. Your Company has an active team to manage its foreign exchange exposures and hence to minimize the risk.

Due to prudent management, your Company has been able to effectively manage its cash flows. There is always an effort to reduce the overall interest costs. Debt : Equity as on March 31, 2017 came down to 0.78 compared to 1.04 as on March 31, 2016. ICRA Limited re-affirmed the long-term rating of [ICRA] A+ and Short Term rating of [ICRA] A1+ assigned to the fund based limits and non-fund based limits of your Company. ICRA also reaffirmed the short-term rating of [ICRA] A1+ assigned to the Commercial Paper programme.

- (i) guiding the Board in relation to appointment and removal of Directors, Key Managerial Personnel and Senior Management employees;
- (ii) evaluating the performance of the members of the Board and provide necessary report to the Board for further evaluation of the Board;
- (iii) recommending to the Board the remuneration payable to the Directors and setting forth a policy for determining remuneration payable to Key Managerial Personnel and Senior Management employees.

2.2. While determining the remuneration for the Directors, Key Managerial Personnel and Senior Management employees, regard should be given to prevailing market conditions, business performance and practices in comparable companies, also to financial and commercial health of the Company as well as prevailing laws and government/other guidelines, to ensure that pay structures are appropriately aligned and the levels of remuneration remain appropriate.

2.3. While designing the remuneration package it should be ensured:

- (i) The level and composition of remuneration is reasonable and sufficient to attract, retain and motivate persons, to ensure the quality required to run the Company successfully.
- (ii) Remuneration to Directors, Key Managerial Personnel and Senior Management employees involves a balance between fixed and incentive pay, reflecting short and long term performance objectives appropriate to the working of the Company and its goals.

2.4. Some part of the remuneration package may be linked to the achievement of corporate performance targets of the Company and a strong alignment of interest with stakeholders.

2.5. The Committee shall observe the set of principles and objectives as envisaged under the Companies Act, 2013 ("Act") (including Section 178 thereof), rules framed thereunder and clause 49 of the Listing Agreement including, *inter-alia*, principles pertaining to determining qualifications, positive attributes, integrity and independence.

2.6. In this context, the following Policy has been formulated by the Nomination and Remuneration Committee and recommended to the Board of Directors for adoption.

Certificate of Compliance with the Corporate Governance Requirements

To,

The Members,
Deepak Nitrite Limited,
9/10, Kunj Society, Alkapuri,
Vadodara 390007 ,
Gujarat.

We have examined the compliance of conditions of Corporate Governance by DEEPAK NITRITE LIMITED ("the Company") having CIN L24110GJ1970PLC001735 for the financial year ended March 31, 2017 as per the relevant provisions of Securities And Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ('Listing Regulations').

The compliance of conditions of Corporate Governance is the responsibility of the Management. Our examination was limited to procedures and implementation thereof, adopted by the Company for ensuring the compliance of the conditions of Corporate Governance. It is neither an audit nor an expression on financial statements of the Company.

In our opinion and to the best of our information and according to the explanations given to us, we certify that the Company has complied with the conditions of Corporate Governance as stipulated in the above-mentioned Listing Regulations, as applicable.

We further state that such compliance is neither an assurance as to future viability of the Company nor the efficiency or effectiveness with which the management has conducted the affairs of the Company.

INDEPENDENT AUDITOR'S REPORT

To the Members of Deepak Nitrite Limited

Report on the Standalone Financial Statements

1. We have audited the accompanying standalone financial statements of Deepak Nitrite Limited ("the Company"), which comprise the standalone balance sheet as at March 31, 2017, and the related standalone statements of profit and loss and cash flow for the year then ended, and a summary of the significant accounting policies and other explanatory information thereon.

Management's Responsibility for the Financial Statements

2. The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 (as amended). This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

3. Our responsibility is to express an opinion on these standalone financial statements based on our audit.
4. We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.
5. We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.
6. An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the financial statements.
7. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

Opinion

8. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India of the state of affairs of the Company as at March 31, 2017, and its profit and its cash flows for the year ended on that date.

Report on Other Legal and Regulatory Requirements

9. As required by the Companies (Auditor's Report) Order, 2016, issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act (the "Order"), and on the basis of such checks of the books and records of the Company as we considered appropriate and according to the information and explanations given to us, we give in the Annexure I a statement on the matters specified in paragraphs 3 and 4 of the Order.

**10. As required by Section 143(3) of the Act, we report that:**

- a. we have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
- b. in our opinion proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;
- c. the balance sheet, the statement of profit and loss and cash flow dealt with by this Report are in agreement with the books of account;
- d. In our opinion, the aforesaid standalone financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 (as amended);
- e. on the basis of written representations received from the directors as on March 31, 2017 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2017, from being appointed as a director in terms of Section 164(2) of the Act.
- f. With respect to the adequacy of internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate report in Annexure II.
- g. With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014(as amended), in our opinion and to the best of our information and according to the explanations given to us:
 - i) The Company has disclosed the impact of pending litigations on its financial position in its financial statements – Refer Note 32 to the financial statements.
 - ii) The Company has made provision, as required under the applicable law or accounting standards, for material foreseeable losses, if any on long-term contracts including derivative contracts.
 - iii) There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company.
 - iv) The Company has provided requisite disclosures in the standalone financial statements as to holdings as well as dealings in Specified Bank Notes during the period from November 8, 2016 to December 30, 2016. ANNEXURE I

TO THE AUDITOR'S REPORT

Referred to in paragraph 9 of our report of even date on the standalone financial statements of Deepak Nitrite Limited for the year ended March 31, 2017

1.
 - i) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.
 - ii) The Company has a rotational programme for verification of its fixed assets over a period of 3 years. In our opinion, the frequency of verification is reasonable having regard to the size of the Company and the nature of its assets. The fixed assets have been physically verified by the Management during the year. Discrepancies noticed on such verification were not material and have been properly dealt with in the books of accounts.
 - iii) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the title deeds of immovable properties are held in the name of the Company.
2. Inventories have been physically verified by management at reasonable intervals during the year. The discrepancies noticed on such verification were not material and have been adjusted in the books of account of the Company.
3. As informed to us and to the best of our knowledge and belief the Company has not granted any loans, secured or unsecured to companies, firms or other parties covered in the register maintained under section 189 of the Act. Accordingly, the provisions of para 3(iii) of the Order are not applicable to the Company.
4. The Company has not granted any loans or provided any guarantees or security to the parties covered under Section 185 and 186. According to the information and explanations given to us and to the best of our knowledge, the provisions of section 185 and 186 of the Act have been complied with in respect of the investments made by the Company.
5. In our opinion and according to the information and explanations given to us and as described in Note 10 to the financial statements, the Company has in respect of the deposits accepted by it complied with the directives issued by the Reserve Bank of India to the extent applicable and the provisions of Sections 73-76 of the Act read with the Rules framed thereunder. According to the information and explanations given to us and to the best of our knowledge and belief, no order has been passed by the Company Law Board or the National Company Law Tribunal or the RBI or any other court or tribunal which is to be complied with by the Company.
6. As informed to us, the maintenance of cost records has been prescribed by the Central Government under section 148(1) of the Companies Act, 2013, in respect of the activities carried on by the Company. We have broadly reviewed the books of account relating to materials, labour and other items of cost maintained by the Company pursuant to the Rules made by the Central Government for the maintenance of cost records and are of the opinion that prima facie the prescribed accounts and records have been maintained. We have not, however, made a detailed examination of the records with a view to determine whether they are accurate or complete.
7.
 - (a) According to the information and explanations given to us and the records of the Company examined by us, in our opinion, the Company is regular in depositing the undisputed statutory dues, including provident fund, employees' state insurance, income tax, sales tax, service tax, duty of customs, duty of excise, value added tax, cess and other material statutory dues, as applicable, with the appropriate authorities. According to the information and explanations given to us no undisputed amounts payable in respect of such statutory dues are in arrears, as on March 31, 2017 for a period of more than six months from the date they became payable.
 - (b) According to the information and explanations given to us, dues of income-tax, sales tax, service tax, excise duty, customs duty and work contract tax which have not been deposited on account of any dispute are as follows:

| Name of the Statute | Nature of Dues | ₹ lakhs | Period to which the amount relates | Forum where pending |
|--------------------------|----------------|---------|------------------------------------|---|

ANNEXURE II

TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE STANDALONE FINANCIAL STATEMENTS OF DEEPAK NITRITE LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Deepak Nitrite Limited ("the Company") as of March 31, 2017 in conjunction with our audit of the standalone financial statements of the Company as at and for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that operate effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of internal financial controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES to Financial Statements for the year ended March 31, 2017

Company overview

Deepak Nitrite Limited ('DNL' or 'the Company') is a prominent chemical manufacturing company. The Company manufactures Basic Chemicals, Fine & Speciality Chemicals and Performance Products.

1. Significant Accounting Policies

Accounting Convention

The accompanying financial statements have been prepared under the historical cost convention on accrual basis, in accordance with Generally Accepted Accounting Principles in India. The Company has prepared these Financial Statements to comply in all material respects with the Accounting Standards specified under the Companies (Accounting Standards) Rules, 2006, and the relevant provisions of the Companies Act, 2013. The accounting policies adopted in the preparation of the financial statements are consistent with those of previous year.

a) Use of Estimates

The preparation of financial statements in conformity with Generally Accepted Accounting Principles requires management to make estimates and assumptions that affect the reported balances of assets and liabilities as of the date of financial statements and reported amounts of income and expenses during the period. Management believes that the estimates used in the preparation of financial statements are prudent and reasonable. Actual results could differ from those estimates. Difference between the actual results and estimates are recognised in the year in which the results are known/materialised.

b) Presentation and Disclosure of Financial Statements

Assets and Liabilities are classified as Current or Non-Current as per the provisions of the Schedule III notified under the Companies Act, 2013, and Company's normal operating cycle. Based on the nature of business and its activities, the Company has ascertained its operating cycle as twelve months for the purpose of Current & Non-Current classification of Assets & Liabilities.

c) (i) Tangible Fixed Assets and Depreciation

Fixed Assets are stated at their original cost of acquisition, less accumulated depreciation and impairment provision. Cost includes all incidental expenses related to acquisition and installation.

Depreciation is provided, pro rata for the period of use, under the Straight Line Method (SLM) except in respect of Aromatics Amines plant where depreciation in respect of plant & machinery is provided on Written Down Value method (WDV). Depreciation on all tangible assets is provided at the rates and in the manner prescribed by Schedule II to the Companies Act, 2013 except in case of leasehold land which is amortised over the period of lease term and certain components of plant & machinery such as Reactors, Centrifuge, Cooling towers, Air Compressor etc. which are depreciated over its useful life as technically assessed by Independent/ Internal Technical Personnel after taking into consideration past experience of the company, chemical process & chemical industry norms.

The items of continuous process plant are identified by the technical officials of the Company.

The excess depreciation provided on revalued fixed assets over the amount computed on the above basis is withdrawn from the Revaluation Reserve and transferred to General Reserve. Premium paid on leasehold land is amortised equally over the tenure of the lease.

In respect of depreciable assets for which Impairment Loss is recognised, depreciation/amortisation is charged on the revised carrying amount over the remaining useful life of the assets computed on the basis of the life prescribed in schedule II to the Companies Act, 2013.

(ii) Intangible Assets

Intangible assets are stated at their original cost of acquisition, less accumulated amortisation and impairment losses, if any. An Intangible Asset is recognised, where it is probable that the future economic benefits attributable to the Asset will flow to the enterprise and where its cost can be reliably measured.

The cost of intangible assets is amortised over the estimated useful life, in any case, not exceeding ten years, on a straight-line basis. Details of estimated useful life is given below:

| | |
|---|----------|
| Software and related implementation costs | 6 years |
| Rights to use facilities | 5 years |
| Technical Know How | 10 years |

d) Impairment of Assets

The carrying amount of cash generating units/assets is reviewed at the Balance Sheet date to determine whether there is any indication of impairment. If such indication exists, the recoverable amount is estimated as the net selling price or value in use, whichever is higher. Impairment loss, if any, is recognised whenever carrying amount exceeds the recoverable amount. The impairment loss recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

e) Inventories

- (i) Raw Materials, Packing Materials and Stores & Spares are valued at cost determined on monthly-moving weighted average basis and are net of Cenvat and VAT.
- (ii) Finished Goods and Stock-in-process are valued at cost of purchase of raw materials and conversion thereof, including the cost incurred in the normal course of business in bringing the inventories up to the present condition or at the net realisable value, whichever is lower. The inventories of joint products are valued by allocating the costs to the joint products by 'Relative Sales Value' method. By-products are valued at net realisable price.

f) Revenue recognition

- (i) Revenue from sales is recognised when the significant risks and rewards associated with ownership of goods are transferred to the buyers and no significant uncertainty exists as to the amount of consideration derived from the sales. Sales is recorded net of trade discounts, rebates, sales taxes, VAT and excise duties (recovery of which realisation is shown separately).
- (ii) Revenue from rendering of services relating to conversion/processing activity is recognised when the converted/processed goods are ready for delivery.
- (iii) Revenue in respect of export incentive, overdue interest, insurance claim, etc. is recognised to the extent that the Company is reasonably certain of its ultimate realisation.

g) Employee Retirement Benefits

(i) Defined Contribution Plans

Company's contributions paid/payable during the year to Provident Fund, Superannuation Fund are recognised in the Statement of Profit and Loss.

(ii) Defined Benefit Plan

Company's liabilities towards gratuity and leave encashment are determined on actuarial basis using the projected unit credit method, which consider each period of service as giving rise to an additional unit of benefit and measure each unit separately to build up the final obligation. Past services are recognised on straight-line basis over the average period until the amended benefits become vested. Actuarial gain and losses are recognised immediately in the Statement of Profit and Loss as income or expense. Obligation is measured at the present value of estimated future cash flow using a discount rate that is determined by reference to market yields at the Balance Sheet date on government bonds, where the currency and terms of the government bonds are consistent with the currency and estimated terms of the defined benefit obligation.

h) Investments

Investments that are readily realisable and intended to be held for not more than twelve months are classified as current investments. All other investments are classified as long term investments.

Current investments are carried at lower of cost and fair value determined on an individual investment basis. Long term investments are carried at cost. However, provision for diminution is made to recognise a decline, other than temporary in nature, in the carrying amount of such long term investments.

i) Foreign currency transactions

- (i) Transactions in foreign currencies are recorded at the exchange rates prevailing on the date of the transaction. Foreign currency monetary assets and liabilities are translated at year end exchange rates. Exchange difference arising on settlement of transactions and translation of monetary items are recognised as income or expense in the year in which they arise. However, exchange difference arising either on settlement or on translation, in case of long-term foreign currency borrowings, in so far as they relate to fixed asset are capitalised and in other cases, are accumulated in a "Foreign Currency Monetary Item Translation Difference Account". The balance in "Foreign Currency Monetary Item Translation Difference Account" is amortised over the balance period of the related long-term borrowings. Similar treatment to gain or loss on forward and hedge contracts relating to long-term borrowings is given. Gain or loss on other forward and hedge contracts are recognised in the Statement of Profit and Loss.
- (ii) The difference between the forward rate and the exchange rate at the inception of the forward contract for underlying transactions is recognised as per the principles set out in i) (i) above.
- (iii) In respect of hedge contracts, for firm commitment or forecasted transactions, the attributable gain or loss is accrued on periodic settlement and/or completion of contract and is recognised as per the principles set out in i) (i) above.

j) Income Tax

Tax expense comprises of both current and deferred tax.

Provision for Current tax is measured at the amount computed under the Income Tax Act, 1961, or Book Profit computed under section 115JB, whichever is higher, and correspondingly set-off available under section 115JAA is credited to the Statement of Profit and Loss of the financial year.

MAT credit is recognised as an asset only when, and to the extent, there is convincing evidence that the Company will pay normal income tax during the specified period. In the year in which the MAT credit becomes eligible to be recognised as an asset in accordance with the recommendations contained in Guidance Note issued by the Institute of Chartered Accountants of India, the said asset is created by way of credit to the Statement of Profit and Loss and shown as MAT Credit Entitlement. The Company reviews the same at each Balance Sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent that there is no longer convincing evidence to the effect that Company will pay normal income tax during the specified period.

Deferred tax assets and liabilities are recognised for future tax consequences attributable to the timing differences between taxable income and accounting income that are capable of reversal in one or more subsequent periods and are measured using tax rates enacted or substantively enacted as at the Balance Sheet date. Deferred tax assets are not recognised unless, in the management judgment, there is virtual certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. The carrying amount of deferred tax is reviewed at each balance sheet date.

k) Earnings per Share

The company reports Basic and Diluted Earnings per Share (EPS) in accordance with the Accounting Standard 20 on 'Earnings per Share'. Basic Earnings per Equity Share is computed by dividing net income by the weighted average number of Equity Shares outstanding for the period. Diluted Earnings per Equity Share are computed by dividing net income by the weighted average number of Equity Shares adjusted for the effects of all dilutive potential Equity Shares.

l) Segment Reporting - Basis of Information

The Company has disclosed business segments as primary segments. The Company operates into 3 (three) segments viz. (i) Basic Chemicals, (ii) Fine & Speciality Chemicals and (iii) Performance Products.

Inter segment transfer prices are normally negotiated amongst the segments with reference to the costs, market prices and business risks, within an overall optimisation objective of the company.

INDEPENDENT AUDITOR'S REPORT

To the Members of Deepak Nitrite Limited

Report on the Consolidated Financial Statements

1. We have audited the accompanying consolidated financial statements of Deepak Nitrite Limited ("the Holding Company"), its subsidiaries (the Holding Company and its subsidiaries together referred to as "the Group") and its associate, comprising the balance sheet as at March 31, 2017 and related consolidated statements of the profit and loss and cash flow for the year then ended, and a summary of the significant accounting policies and other explanatory information thereon ("the consolidated financial statements").

Management's Responsibility for the Consolidated Financial Statements

2. The Holding Company's Board of Directors is responsible for the preparation of these consolidated financial statements in terms of the requirements of the Companies Act, 2013 ("the Act") that give a true and fair view of the consolidated financial position, consolidated financial performance and consolidated cash flows of the Group including its associate in accordance with the accounting principles generally accepted in India, including the accounting standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014. The respective Board of Directors of the companies included in the Group and of its associate are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and for preventing and detecting frauds and other irregularities; the selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

Auditor's Responsibility

3. Our responsibility is to express an opinion on these consolidated financial statements based on our audit. While conducting the audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.
4. We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.
5. An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Holding Company's preparation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Holding Company's Board of Directors, as well as evaluating the overall presentation of the consolidated financial statements.
6. We believe that the audit evidence obtained by us and the audit evidence obtained by the other auditors in terms of their reports in respect of the matters referred to in paragraph 8 of the Other Matters section, is sufficient and appropriate to provide a basis for our audit opinion on the consolidated financial statements.

Opinion

7. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid consolidated financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India of the consolidated state of affairs of the Group and its associate as at March 31, 2017, and its profit and its cash flows for the year ended on that date.

Other Matters

8. We did not audit the financial statements of one subsidiary, whose financial statements reflect total assets of ₹ 271.29 lakhs (before consolidation adjustments) as at March 31, 2017, total revenue of ₹ 1,170.26 lakhs (before consolidation adjustments) and net cash flows amounting to ₹ 16.55 lakhs (before consolidation adjustments) for the year ended on that date. The consolidated financial statements also include the Group's share of net loss of ₹ 14.21 lakhs for the year ended March 31, 2017, in respect of one associate, whose financial statements have not been audited by us. These financial statements have been audited by other auditors whose reports have been furnished to us by the Management and our

opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of the aforesaid subsidiary and associate, is based solely on the reports of the other auditors.

Our opinion on the consolidated financial statements, and our report on Other Legal and Regulatory Requirements below, is not modified in respect of the above matters with respect to our reliance on the work done and the reports of the other auditors.

Report on Other Legal and Regulatory Requirements

9. As required by Section 143(3) of the Act, we report, to the extent applicable that:
- a. we have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit of the aforesaid consolidated financial statements;
 - b. in our opinion proper books of account as required by law relating to preparation of the aforesaid consolidated financial statements have been kept by the Company so far as it appears from our examination of those books and the reports of the other auditors;
 - c. the consolidated balance sheet, the consolidated statement of profit and loss and the consolidated cash flow statement dealt with by this report are in agreement with the books of account maintained for the purpose of preparation of the consolidated financial statements;
 - d. In our opinion, the aforesaid consolidated financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 (as amended);
 - e. On the basis of the written representations received from the directors of the Holding Company as on March 31, 2017 taken on record by the Board of Directors of the Holding Company and the reports of the statutory auditors of its subsidiary company, incorporated in India, none of the directors of the Group companies, incorporated in India is disqualified as on March 31, 2017 from being appointed as a director in terms of Section 164 (2) of the Act.
 - f. With respect to the adequacy of internal financial controls over financial reporting of the Company and its Indian subsidiary and the operating effectiveness of such controls, refer to our separate report in Annexure I.

ANNEXURE I

TO OUR REPORT OF EVEN DATE IN THE CONSOLIDATED FINANCIAL STATEMENTS OF DEEPAK NITRITE LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

In conjunction with our audit of the consolidated financial statements of Deepak Nitrite Limited as of and for the year ended March 31, 2017, we have audited the internal financial controls over financial reporting of Deepak Nitrite Limited ("the Holding Company") and its subsidiary company incorporated in India ("Indian Subsidiary Company"), as of that date.

Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the Holding company and its Indian Subsidiary Company are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013 ("the Act").

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Holding Company and its Indian Subsidiary Company have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES to Consolidated Financial Statements for the year ended March 31, 2017

Company overview

Deepak Nitrite Limited ('DNL' or 'the Company') is a prominent chemical manufacturing Company. The Company manufactures Basic Chemicals, Fine & Speciality Chemicals and Performance Products. The Company along with its subsidiaries and associate entity which are consolidated (Refer Note 2 below) are referred to as the "Company"

1. Significant Accounting Policies

Accounting Convention

The consolidated financial statements have been prepared under the historical cost convention on accrual basis, in accordance with Generally Accepted Accounting Principles in India. The Company has prepared these Financial Statements to comply in all material respects with the Accounting Standards specified under the Companies (Accounting Standards) Rules, 2006, and the relevant provisions of the Companies Act, 2013. The accounting policies adopted in the preparation of Financial Statements are consistent with those of previous year.

a) Use of Estimates

The preparation of the consolidated financial statements in conformity with Generally Accepted Accounting Principles requires management to make estimates and assumptions that affect the reported balances of assets and liabilities as of the date of financial statements and reported amounts of income and expenses during the period. Management believes that the estimates used in the preparation of financial statements are prudent and reasonable. Actual results could differ from those estimates. Difference between the actual results and estimates are recognised in the year in which the results are known/materialised.

b) Presentation and Disclosure of Financial Statements

Assets and Liabilities are classified as Current or Non-Current as per the provisions of the Schedule III notified under the Companies Act, 2013, and Company's normal operating cycle. Based on the nature of business and its activities, the Company has ascertained its operating cycle as twelve months for the purpose of Current & Non-Current classification of Assets & Liabilities.

c) (i) Tangible Fixed Assets and Depreciation

Fixed Assets are stated at their original cost of acquisition, less accumulated depreciation and impairment provision. Cost includes all incidental expenses related to acquisition and installation.

Depreciation is provided, pro rata for the period of use, under the straight line method (SLM) except in respect of Aromatics Amines plant where depreciation in respect of plant & machinery is provided on written down value method (WDV). Depreciation on all tangible assets is provided at the rates and in the manner prescribed by Schedule II to the Companies Act, 2013 except in case of leasehold land which is amortised over the period of lease term and certain components of plant & machinery such as Reactors, Centrifuge, Cooling towers, Air Compressor etc. which are depreciated over its useful life as technically assessed by Independent/Internal Technical Personnel after taking into consideration past experience of the Company, chemical process & chemical industry norms.

The items of continuous process plant are identified by the technical officials of the Company.

The excess depreciation provided on revalued fixed assets over the amount computed on the above basis is withdrawn from the Revaluation Reserve and transferred to General Reserve. Premium paid on leasehold land is amortised equally over the tenure of the lease.

In respect of depreciable assets for which Impairment Loss is recognised, depreciation/amortisation is charged on the revised carrying amount over the remaining useful life of the assets computed on the basis of the life prescribed in schedule II to the Companies Act, 2013.

(ii) Intangible Assets

Intangible assets are stated at their original cost of acquisition, less accumulated amortisation and impairment losses, if any. An Intangible Asset is recognised, where it is probable that the future economic benefits attributable to the Asset will flow to the enterprise and where its cost can be reliably measured.

The cost of intangible assets is amortised over the estimated useful life, in any case, not exceeding ten years, on a straight-line basis. Details of estimated useful life is given below:

| | |
|---|----------|
| Software and related implementation costs | 6 years |
| Rights to use facilities | 5 years |
| Technical Know How | 10 years |

d) Impairment of Assets

The carrying amount of cash generating units/assets is reviewed at the Balance Sheet date to determine whether there is any indication of impairment. If such indication exists, the recoverable amount is estimated as the net selling price or value in use, whichever is higher. Impairment loss, if any, is recognised whenever carrying amount exceeds the recoverable amount. The impairment loss recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

e) Inventories

- (i) Raw Materials, Packing Materials and Stores & Spares are valued at cost determined on monthly-moving weighted average basis and are net of Cenvat and VAT.
- (ii) Finished Goods and Stock-in-process are valued at cost of purchase of raw materials and conversion thereof, including the cost incurred in the normal course of business in bringing the inventories up to the present condition or at the net realisable value, whichever is lower. The inventories of joint products are valued by allocating the costs to the joint products by 'Relative Sales Value' method. By-products are valued at net realisable price.

f) Revenue recognition

- (i) Revenue from sales is recognised when the significant risks and rewards associated with ownership of goods are transferred to the buyers and no significant uncertainty exists as to the amount of consideration derived from the sales. Sales is recorded net of trade discounts, rebates, sales taxes, VAT and excise duties (recovery of which realisation is shown separately).
- (ii) Revenue from rendering of services relating to conversion/processing activity is recognised when the converted/processed goods are ready for delivery.
- (iii) Revenue in respect of export incentive, overdue interest, insurance claim, etc. is recognised to the extent that the Company is reasonably certain of its ultimate realisation.

g) Employee Retirement Benefits

(i) Defined Contribution Plans

Company's contributions paid/payable during the year to Provident Fund, Superannuation Fund are recognised in the Statement of Profit and Loss.

(ii) Defined Benefit Plan

Company's liabilities towards gratuity and leave encashment are determined on actuarial basis using the projected unit credit method, which consider each period of service as giving rise to an additional unit of benefit and measure each unit separately to build up the final obligation. Past services are recognised on straight-line basis over the average period until the amended benefits become vested. Actuarial gain and losses are recognised immediately in the Statement of Profit and Loss as income or expense. Obligation is measured at the present value of estimated future cash flow using a discount rate that is determined by reference to market yields at the Balance Sheet date on government bonds, where the currency and terms of the government bonds are consistent with the currency and estimated terms of the defined benefit obligation.

h) Investments

Investments that are readily realisable and intended to be held for not more than twelve months are classified as current investments. All other investments are classified as long term investments.

Current investments are carried at lower of cost and fair value determined on an individual investment basis. Long term investments are carried at cost. However, provision for diminution is made to recognize a decline, other than temporary in nature, in the carrying amount of such long term investments.

i) Foreign currency transactions

- (i) Transactions in foreign currencies are recorded at the exchange rates prevailing on the date of the transaction. Foreign currency monetary assets and liabilities are translated at year end exchange rates. Exchange difference arising on settlement of transactions and translation of monetary items are recognised as income or expense in the year in which they arise. However, exchange difference arising either on settlement or on translation, in case of long-term foreign currency borrowings, in so far as they relate to fixed asset are capitalised and in other cases, are accumulated in a "Foreign Currency Monetary Item Translation Difference Account". The balance in "Foreign Currency Monetary Item Translation Difference Account" is amortised over the balance period of the related long-term borrowings. Similar treatment to gain or loss on forward and hedge contracts relating to long-term borrowings is given. Gain or loss on other forward and hedge contracts are recognised in the Statement of Profit and Loss.
- (ii) The difference between the forward rate and the exchange rate at the inception of the forward contract for underlying transactions is recognised as per the principles set out in i) (i) above.
- (iii) In respect of hedge contracts, for firm commitment or forecasted transactions, the attributable gain or loss is accrued on periodic settlement and/or completion of contract and is recognised as per the principles set out in i) (i) above.

j) Income Tax

Tax expense comprises of both current and deferred tax.

Provision for Current tax is measured at the amount computed under the Income Tax Act, 1961, or Book Profit computed under section 115JB, whichever is higher, and correspondingly set-off available under section 115JAA is credited to the Profit & Loss Statement of the financial year.

MAT credit is recognised as an asset only when, and to the extent, there is convincing evidence that the Company will pay normal income tax during the specified period. In the year in which the MAT credit becomes eligible to be recognised as an asset in accordance with the recommendations contained in Guidance Note issued by the Institute of Chartered Accountants of India, the said asset is created by way of credit to the Statement of Profit and Loss and shown as MAT Credit Entitlement. The Company reviews the same at each Balance Sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent that there is no longer convincing evidence to the effect that Company will pay normal income tax during the specified period.

Deferred tax assets and liabilities are recognised for future tax consequences attributable to the timing differences between taxable income and accounting income that are capable of reversal in one or more subsequent periods and are measured using tax rates enacted or substantively enacted as at the Balance Sheet date. Deferred Tax assets are not recognised unless, in the management judgment, there is virtual certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. The carrying amount of deferred tax is reviewed at each balance sheet date.

k) Earnings per Share

The Company reports Basic and Diluted Earnings per Share (EPS) in accordance with the A S 20 on 'Earnings per Share'. Basic Earnings per Equity Share is computed by dividing net income by the weighted average number of Equity Shares outstanding for the period. Diluted Earnings per Equity Share are computed by dividing net income by the weighted average number of Equity Shares adjusted for the effects of all dilutive potential Equity Shares.

l) Segment Reporting - Basis of Information

The Company has disclosed business segments as primary segments. The Company operates into 3 (three) segments viz. (i) Basic Chemicals, (ii) Fine & Speciality Chemicals and (iii) Performance Products.

Inter segment transfer prices are normally negotiated amongst the segments with reference to the costs, market prices and business risks, within an overall optimisation objective of the Company.

Revenue and expenses have been accounted on the basis of their relationship to the operating activities of the segment. Revenue and expenses, which relate to the enterprise as a whole and are not allocable to segments on reasonable basis, have been included under "Unallocable Expenses". Assets and Liabilities which relate to the enterprise as a whole but are not allocable to segments on a reasonable basis, have been included under "Unallocable Assets/Liabilities".

Secondary segment have been identified with reference to geographical location of external customers. Composition of secondary segment is as follows: (i) India and (ii) Outside India

**m) Borrowing costs**

Borrowing costs directly attributable to the acquisition/construction of qualifying assets as also the borrowing costs of funds borrowed generally and used for the purpose of acquisition/construction of such assets is capitalised up to the date the assets are ready for use. Other borrowing costs are recognised as an expense in the period in which they are incurred.

n) Operating Lease

Operating lease payments are recognised as an expense in the Statement of Profit and Loss on a straight-line basis, which is representative of the time pattern of the user's benefit.

o) Cash Flow statement

The Cash Flow Statement is prepared by the indirect method set out in AS 3 'Cash Flow Statements', whereby the Profit Before Tax is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The Cash flows from regular revenue generating, investing and financing activities of the Company are segregated.

p) Provisions and Contingent Liabilities

Provisions are recognised in the accounts in respect of present probable obligations, the amount for which can be reliably estimated.

Contingent liabilities are disclosed in respect of possible obligations that arise from past events but their existence is confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company.

2. Principles of Consolidation :

The Consolidated Financial Statements (CFS) comprise the Financial Statements of Deepak Nitrite Limited and its subsidiaries and associate as at 31 March 2017. The Consolidated Financial Statements have been prepared in accordance with Accounting Standard 21 (AS-21) "Consolidated financial statements", Accounting Standard (AS-23) "Accounting for Investment in Associate in Consolidated Financial Statement" notified by Companies (Accounting Standard) Rules, 2006 (as amended). The basis for preparing the consolidated financial statements is given below:

- (i) The financial statements of the Company and its subsidiaries have been consolidated on a line-by-line basis by adding the book values of like items of assets, liabilities, income and expenses, after eliminating intra-group balances and the unrealised profits / losses on intra-group transactions, and are presented to the extent possible, in the same manner as the Company's separate financial statements. The cash flow statement has been prepared using uniform policies for the transactions. The financial statements of all entries used for consolidation are drawn up to the same reporting date as that of the Company i.e. 31 March 2017.
- (ii) In case of foreign subsidiary, being Integral Foreign Operations, revenue items are consolidated at the average rate that approximates the actual rate at the date of transaction. All monetary items are translated in to Consolidated financial statements at exchange rate in effect at the balance sheet date. Any exchange difference arising on consolidation is recognised in the Statement of Profit and Loss.
- (iii) Investments in Associate Company are accounted under the Equity method as per the Accounting Standard – 23 (AS-23) "Accounting for Investments in Associates in Consolidated Financial Statements" notified under the Companies (Accounting Standards) Rules, 2006 (as amended). Under the Equity method, the investment in Associate is carried in the Balance Sheet at cost plus post acquisition changes in the Group's share of net assets of the Associate. The Statement of Profit and Loss reflects the Group's share of the results of operations of the associates.
