

Policy on Environmental Sustainability

We, at Deepak Nitrite Ltd (DNL) are conscious of fulfilling our duty for environment protection and to make tomorrow cleaner, greener and more sustainable. We are continuously working on to reduce the environmental impact of our business activities and develop methodology that benefit the environment.

We support United Nations in the implementation of the UN Sustainable Development Goals (SDGs), which create the framework for sustainable business practices at the economic, social and environmental levels. To achieve this goal, we are proactively committed to:

- 1) Comply with all applicable laws and legal regulations and where appropriate, improve performance beyond requirements.
- 2) Minimise waste generation, discharge and disposal to the environment and protect environment thorough pollution prevention.
- 3) Reduce Green House Gas (GHG) emission and energy consumption through improvement programs.
- 4) Focus on water conservation measures, waste-water treatment, preserve water resources, reduce the impact of effluent release, rainwater harvesting and continually reduce net water consumption.
- 5) Eliminate or minimize emissions of dust, noise, odor, accidental pollution and road congestion in and around company facilities.
- 6) Consider environment aspects in planning and decision-making and ensure adoption of resource efficient and cleaner production methods and techniques.
- 7) Conserve natural resources and continuously enhance contribution from renewable energy sources.
- 8) Evaluate environmental impact of a product through its life cycle and initiate actions based on that to reduce the impact on environment.
- 9) Ensure safe handling of chemicals and waste materials and implement emergency response plan to address any incidents involving pollution to the environment.
- 10) Conduct operations in a manner that protects and conserves environment and enriches biodiversity.
- 11) Where possible, purchase and use materials that have minimal impact on the environment.
- 12) Enhance EHS performance by setting objectives and targets and periodically review progress against short and long-term goals.
- 13) Raise awareness of suppliers and other stakeholders on the importance of biodiversity conservation and sustainable use of natural resources.
- 14) Enhance environmental awareness through participation and consultation with employee and contractors by training and effective channels of communication and encourage them to act in a more responsible manner towards the environment.
- 15) Participate and work with community, industry organisations, Government and Non-Government organisations that are engaged in policy advocacy and promote Responsible chemistry.

This policy is communicated to all concerned in an appropriate and meaningful manner. DNL Units have appropriate systems and processes in place to ensure compliance with the Policy and with statutory provisions, including processing of grievances for redressal.
