

Sustainable Procurement Policy

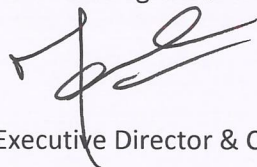

Deepak Nitrite Limited (DNL) is committed to the principles of sustainability and care, guiding our pursuit of 'Responsible Chemistry.' Recognizing the significance of supply chains, we aim to set industry standards in Sustainable Development.

As a responsible corporate entity, our vision is to be a 'Global partner of choice,' delivering reliable products through responsible and sustainable practices. Our commitment to stakeholders integrates core values such as 'Innovativeness,' 'Agility,' 'Responsiveness,' 'Performance-Driven,' and 'Ownership' into our operations.

Our objectives include:

- Ensure compliance with applicable legal and other requirements, emphasizing Occupational Health, Safety, Environment, Quality, and ESG aspects.
- Prioritizing the purchase of locally available high-quality materials/products to minimize DNL's environmental footprint.
- Establishing a supplier diversity program that is based on the principle of diversity, equity and inclusion for equal opportunity to all including small, minority-owned, women-owned, disadvantaged/disabled, veteran owned and LGBTQA business enterprises in supply chain.
- Communicating the Supplier Code of Conduct to all suppliers, integrating it into contracts and purchase orders.
- Transparently communicating the supplier engagement process, including pre-qualification, on boarding process and performance monitoring.
- Procuring goods and services from suppliers compliant with DNL's code of conduct.
- Strengthening relationships with key suppliers through capacity-building programs, engagement initiatives, and sharing best practices.
- Monitoring the supply chain for ESG-related aspects outlined in the DNL Supplier Code of Conduct (Labour and Human Rights, Health, and Safety, Environmental, Integrity and Anti-Corruption, Trade Compliance).
- Collaborating with suppliers, vendors, and partners for continual process improvement.

We value feedback from stakeholders to enhance our systems and processes. Progress against this policy will be measured yearly, with ongoing reviews to ensure effective management and adjustments. The content and implementation of this policy will be subject to periodic review, with actions taken accordingly and good practices shared throughout DNL.
